THE SIX DAYS OF CREATION—SPIRITUAL & ASTROPHYSICAL TRUTHS

Can you answer these? Look for the brief answers below.

1. Who is God?
2. When did time begin?
3. How did God create?
4. What is the significance of the Earth's creation before the Sun, Moon, and other celestial objects?
5. What did God create first and why?
6. What did the Spirit of God moving upon the face of the waters produce?
7. How is the day calculated?
8. What is the firmament?
9. Was there a supercontinent?
10. Where did all the water go?
11. How do you explain the great distances starlight must travel to get to an observer on Earth?
12. If possible, describe the firmament and its distinction from the heaven mentioned in Genesis 1:1, and the significance of God 'setting' these celestial objects at a specific distance, direction, and location within the universe?

ANSWERS:

1. The word used for God is Elohim or three-in-one. This three-in-one concept is revealed in Genesis 1:26 where God states, "And God said, Let us make man in our image, after our likeness." The plurality, namely God in three persons, is echoed again In Genesis 3:22, "And the LORD God said, Behold, the man is become as one of us." From cover to cover, the trinity is evident throughout the Bible. In the counterfeit Roman Catholic 'bible' it may not be evident; however, in the KJV it becomes incrementally apparent as the student of the scriptures grows and recognizes the nuances in the Old and New Testaments--LORD, Lord, Spirit, Holy Spirit, Holy Ghost, holy Spirit. The complexity and nature of God will be addressed later.
2. Time began when God decreed it in the beginning. Working forward from creation, an accurate chronology can be determined. I have done it!

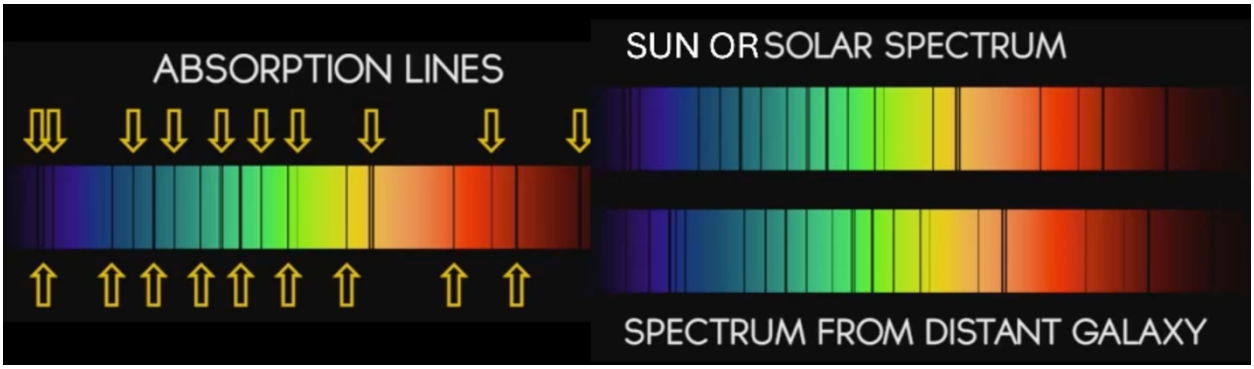

3. Ex-nihilo means creation from nothing visible. The Father created everything by Jesus Christ, the Word, therefore God spoke everything into existence by sound.[1]
4. The importance of the Earth's creation cannot be over emphasized as it is at the center of all of God's attention, activity, and energy. I do not buy into the idea of life on other planets or in other constellations; however, I do believe that demons masquerading as aliens or sentiens are targeting the naïve, ignorant, and spiritually blind convincing them of life elsewhere. Do I embrace the concept of off-world technology, NO! So many technological patents have been hidden or suppressed, while their existence denied. This has been standard operating procedure for the morally bankrupt Deep State.
5. God created the black matrix of space before anything else.[2] This blackness of space veils man from God's glory . . . For no man can look upon God and live.
6. The Spirit of God moving upon the face of the waters created light . . . The light of Jesus Christ. The significance of this spiritual precept cannot be emphasized enough!
7. The day, according to God's calculation, starts with 12 hours of darkness ultimately giving way to 12 hours of daylight. Man's current method of calculating the day is a disaster. When it is noon, or 12:00 p.m. we still have approximately 6 hours of daylight. Does this make sense? When we get to 12:00 a.m. we encounter approximately 6 hours of darkness. Hmm! Ridiculous, I would say.
8. God placed an expanse in the middle of the waters surrounding the Earth. It was this expanse that became the firmament and where God was to set all the celestial objects.
9. The concept of a supercontinent such as Pangea is purely speculative and not based upon any solid evidence. God created the Earth with the appearance of age--mountains, ocean basins, alluvial valleys, etc. He did this when creating Adam and Eve as well. Volcanoes, tectonic plates, an ice age, a continent covered with ice (Antarctica), cosmic nebula, comets, asteroids, and supernova are just some of the phenomenon appearing after man's sin and God's judgment of man's sin by a universal flood.

---

[1] Psalm 19:1-4--The heavens declare the glory of God; and the firmament sheweth his handywork. 2 Day unto day uttereth speech, and night unto night sheweth knowledge. 3 *There is* no speech nor language, *where* their voice is not heard. 4 Their line is gone out through all the earth, and their words to the end of the world. In them hath he set a tabernacle for the sun,

[2] The counterfeit Roman Catholic 'bibles,' with their corrupted Alexandrian manuscripts, inaccurately render the word heavens, in the plural, when it should be singular, heaven. God had a specific sequence and method (miraculous creation) by which the creation week unfolded.

10. Before the flood, God spread[3] the Earth and created ocean basins. When the flood came, the great fountains of the deep were broken up and that water, along with the 40 days and 40 nights of torrential rains, inundated islands, continents, and heretofore existing human migration land bridges.
11. In simple terms it can be explained through instantaneous, miraculous creation. So the light Adam and Eve perceived coming from the celestial objects created on day 4 was instantaneous light emitted from those objects. God stretched out the heavens as it says in Isaiah 40:22.
    To answer the question in more detail we turn to the phenomenon known as **RED SHIFTING**. In the parlance of astrophysics,[4] astronomy,[5] or cosmology[6] this theoretical proposition suggests that celestial objects are moving away from us and therefore the light received from these objects to an observer on Earth, must translate into millions or billions of light years. Light travels approximately 6,000,000,000,000 or 6 trillion miles in a year.

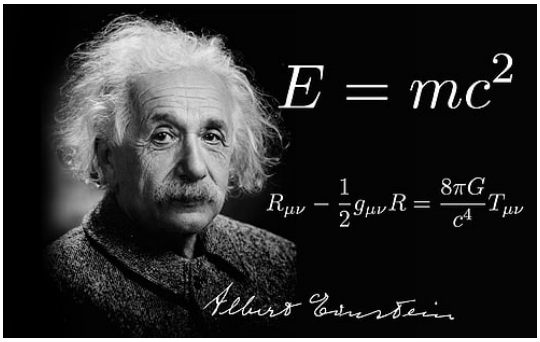

The absorption lines represent colors of the spectrum that are absorbed as light coming from a stellar object moves through the stars' atmosphere and disappears, making its way to the surface of that object. These absorption lines are responsible for the 'breaks' in the continuity within that spectrum of light.

Cosmologists (individuals who study the origin and nature of the universe) claim that the bottom spectrum from distant galaxies and stars is red shifted. This assumes the celestial objects are moving away, while ignoring the fact that these stellar objects consist mainly of the same elements: hydrogen, helium, and lithium-

[3] Isaiah 44:24--Thus saith the LORD, thy redeemer, and he that formed thee from the womb, I *am* the LORD that maketh all *things;* that stretcheth forth the heavens alone; that spreadeth abroad the earth by myself;
[4] The astrophysicist attempts to explain the nature of physical laws operating in the context of the observable universe.
[5] Astronomers, while using a growing selection of ground based as well as satellite optical devices, records and theorizes what they observe in their ability to understand the visible heavens.
[6] A cosmologist attempts to explain the origin of the universe and therefore the purpose and philosophical existence of it all. Unfortunately, more often than not, this is through the lens of evolution and uniformitarianism (the present proves the past).

-giving each object a distinct compositional signature from all others. What the spectrograph and spectral lines from the distant galaxy (bottom) reveal are **COMPOSITIONAL DIFFERENCES** from that of our Sun, **NOT DISTANCE**. Blue-shifted galaxies, supposedly those moving toward us, are not moving toward us, but are simply compositionally distinct from that of our Sun. Each star differs in glory from another (I Cor. 15:41).

Even Einstein admitted that the reception of light to an observer on Earth could be received simultaneously or instantaneously from an object emitting that light source. He stated that this phenomenon, "is in reality neither a supposition nor a hypothesis about the physical nature of light, but a stipulation which I can make of my own freewill in order to arrive at a definition of simultaneity." (A. Einstein, "Relativity: The Special and General Theory," authorized translation by R. W. Lawson, New York, Crown Publishers © 1961, pp. 22-23)

12. The heaven, singular, created in Genesis 1:1, is the dark matrix of interstellar space. It is the majority of the matter contained in the universe. The firmament, created by God, was placed in the midst of the waters surrounding the Earth. This void expanded and became what was known as the firmament. It is where the Sun, Moon, and stars were placed. Think of the firmament as a pliable and expansive piece of three-dimensional graph paper. The Sun, Moon, and stars were "set" (Genesis 1:17) in the firmament. They were placed by Providence at a specific distance, location, and direction. They are unmovable, yet mobile,[7] within the system we know as the universe.

[7] God is NOT static but dynamic. Such is the case with everything he created. It is moving. It is living. It is changing. It is progressing, developing, and maturing NOT EVOLVING. In the universe our Solar System is moving within our Milky Way Galaxy. This phenomenon in turn is moving, dynamic, and expanding within our universe.
