

Trump to abolish Daylight Savings Time

Trump's cabinet appointments must earn the respect of D.J.T. & 'We the People'

Jack Smith, Fanni Willis, Alvin Bragg
HYPOCRITICAL LAWFARE TRIO

Holographic projection drones to deceive the masses

Food grade diatomaceous earth: anti-parasitic and heavy metal remover

1. LET US NOT BE LIKE EUROPE—Trump plans to eliminate Daylight Savings Time because of its inconvenience, cost, and initial illogical implementation. Adopted during the 1970's energy crisis, brought about by a Deep State distraction also known as a red herring, Daylight Savings Time was meant to boost productivity and reduce energy consumption. The energy savings argument doesn't fly; however, because once people move from outdoors to indoors energy consumption will naturally spike. This also goes for the metric system. What happened to miles, feet, inches, gallons, quarts, and pints.
2. THEY ALL HAVE A CHANCE TO PROVE THEMSELVES TO 'WE THE PEOPLE'—A few of Trumps' appointees and more to follow in the weeks to come:
 - Kimberly Guilfoyle—Ambassador to Greece
 - Marco Rubio—Secretary of State
 - Chief-of-Staff—Suzie Wiles
 - D.O.G.E. (Dept. of Government Efficiency)—Vivek Ramaswamy & Elon Musk. A 90% reduction in government across the board (federal, state, county, city) is slated to occur shortly after E.B.S. (Emergency Broadcast System) when the 10-12 days of internet silence is observed and people are compelled to witness the 'reveal' (all the lies we have been fed through the mainstream media, liberal academia and university presidents, as well as Jesuitical censorship within the system of public libraries, as well as the complicit publishing houses)
 - Robert F. Kennedy Jr.—Secretary of Health & Human Services. Eliminate the C.D.C., N.I.H., Food and Drug Administration, childhood vaccines, and any other medically related bureaucracy that threatens our individual autonomy under the phony guise of national health and 'security'
 - David Sacks—Ai & Crypto Czar. While crypto was a Deep State operation, crypto tokens should be backed by precious metals even as our lawful money is.
 - Kari Lake—*Voice of America* (international broadcasting media funded by American taxpayers). She will be joined by many digital warriors within the truth movement whose voice and popularity will increase given the ultimate destruction of the universal propaganda information dissemination
 - Dan Bishop—(Office of Management & Budget) O.M.B. Director. His job will become much easier with the disappearance of the Federal Reserve and the notorious I.R.S. With real money, namely gold and silver coin, augmented by gold and silver rainbow certificates issued by the U.S. Treasury, an accountable

money trail will be established through a multitude of unhackable blockchain ledgers

- Tom Homan—Trump’s selection for border czar. He will stop the disgraceful DNC practice of buying votes with taxpayer money.
3. NEITHER LEGAL NOR JUST—N.Y. subway hero Daniel Penny was acquitted of negligent homicide by lawfare Liberals. Penny’s chokehold of Jordan Neeley was necessary as Neeley was spewing abusive death threats to subway passengers. Penny’s chokehold resulted in the subsequent death of a defiant, physically resistant, and homeless Neeley.
 4. WRAY CAN’T HIDE FROM SPACE FORCE—Corrupt Director of the F.B.I., Christopher Wray resigns before Trump’s long arm of vengeance brings him to justice. You may run and hide Wray, but Space Force knows where you are. Wray’s next stop Gitmo.
 5. SPYING UNDER THE GUISE OF SOCIAL MEDIA—The C.C.P.’s espionage app Tik Tok is set for removal from U.S. app. stores.
 6. NATIONAL SECURITY BREACH—Numerous drones spotted over the City of New York and New Jersey are causing security concerns among residents and city officials. A credible [source](#) has revealed that these drones are part of a D.A.R.P.A. (Defense Advanced Research Projects Agency) project employing holographic projectors whose ultimate objective is deception, fear, and psychosis of the masses.
 7. PARASITES NOT CANCER—N.F.L. Hall of Famer Randy Moss announces his battle with cancer (most likely parasites and their eggs). If Moss got the ‘jab,’ he is encountering parasites and their eggs. In England this parasite explosion within the body has been wrongly identified and labeled as ‘turbo cancer’ . . . It is more profitable for the medical establishment to label the diagnosis as such. There is an easy fix physically and financially; however, and it’s found in the anti-parasitics like hydroxychloroquine, ivermectin or food-grade diatomaceous earth.
 8. WANTED: BIDEN CRIME FAMILY—Biden commutes sentence of judge who received \$2.1 in “Kids-for-Cash” scandal. One of many more illicit activities that can be added to the Biden crime family.
 9. GOOD RIDDANCE SANCTUARY CITIES—Virginia Governor Yougkin proposes state ban on sanctuary cities by withholding funding from those localities where crime by illegals has skyrocketed. He will get national support from M.A.G.A. and border czar Tom Homan to stop all illegal entry into the U.S. as well as support for deporting all aliens back to their country of origin
 10. CASH FOR ILLEGALS—Biden auctioning off parts of border wall before Trump’s inauguration. Pathetic Biden won’t be able to buy votes from illegals any more as the flood of illegal entries will be shut down immediately under a Trump presidency.
