

USAFACTS

US Coronavirus vaccine tracker

Each state has a different plan — and different challenges — in distributing vaccines. Learn more about who is getting vaccinated by parsing the data by age, sex and race.

Data Updated Aug 31

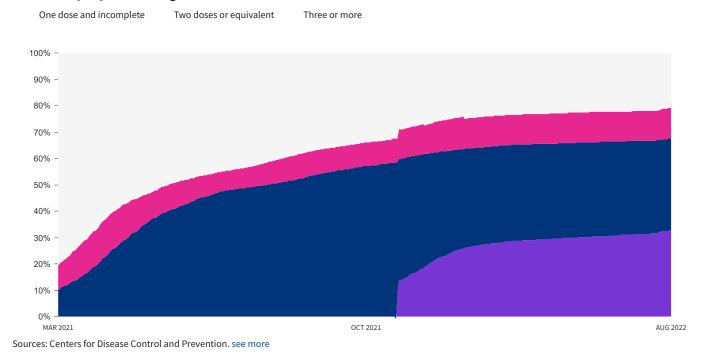

What's the nation's progress on vaccinations? ①

At least 262,908,216 people or 79% of the population have received at least one dose.

Overall, 224,113,439 people or 68% of the population are considered fully vaccinated.

Additionally, 108,806,974 people or 33% of the population have received a booster dose.

Percent of people receiving vaccines in the US

In the US, 890,758,935 doses have been distributed so far, with 71% or 636,871,557 of the doses used.

(i) * In Dec. 2021, the CDC capped vaccination estimates to 95% to account for accuracy differences in vaccination coverage estimates between jurisdictions.

How do COVID-19 vaccinations differ by sex? ①

Percent of people by sex receiving at least one dose or fully vaccinated.

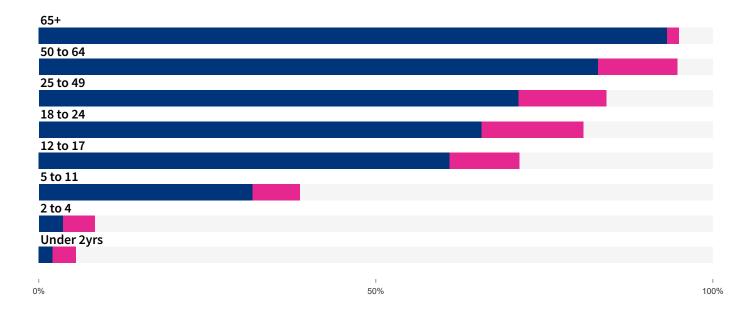

According to the Centers for Disease Control and Prevention, there is sex information for 99% of people who received at least one dose and 99% of fully vaccinated people.

What percentage of people in each age range received the COVID-19 vaccine? ①

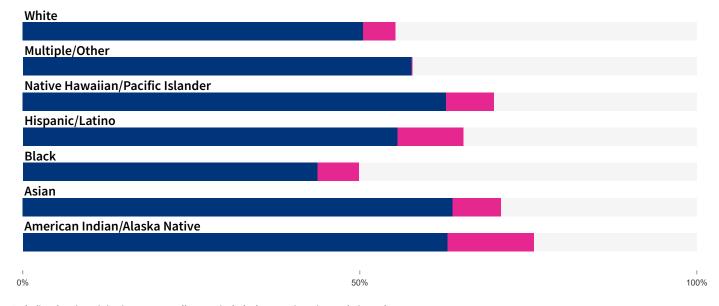

Percent of people by age receiving at least one dose or fully vaccinated.

According to the Centers for Disease Control and Prevention, there is age information for 99% of people who received at least one dose and 99% of fully vaccinated people.

What percentage of people in each race or ethnic group received the COVID-19 vaccine? ①

According to the Centers for Disease Control and Prevention, there is race or ethnic information for **74%** of people who received **at least one dose** and **78%** of **fully vaccinated** people.

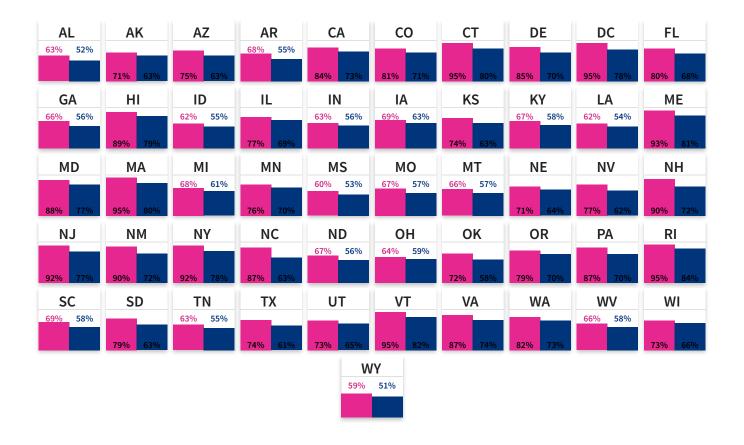

Excluding the Hispanic/Latino category, all groups include the non-Hispanic population only.
