TRANSCRIPT edited by Paul J. Wickliffe (thedayofthelord.info)

With the liberation balance sheet, what is revealed is the mathematical foundation of infinite abundance. Behind the controlled collapse of the old-world order lies a mathematical certainty, humanity was artificially kept in a state of poverty and scarcity for centuries. When we synthesize real global economic data and extract waste, interest burdens, and suppressed technologies, the most impressive overall picture of our ongoing narrative unfolds.

It is the precise proof that the transition into the new era is not a utopian dream, but the mathematical liberation of astronomical sums that will, henceforth, benefit all of mankind.

The gargantuan relief of the global population is built upon four fundamental pillars that instantly disarm the debt-based fiat system and the old elite:

1. **THE END OF A LEGAL TAX EXTORTION**—approximate savings of \$15 trillion **ANNUALLY**

In the old structure, trillions in tax dollars flowed via private central banking networks directly into the pockets of the Deep State without ever serving the citizens. The mere abolition of unconstitutional income taxes and illegally levied dues will instantly return around \$15 trillion in purchasing power to the global population. Every hard-earned cent will henceforth remain exactly where it was generated, in the hands of the people.

2. **ELIMINATION OF WASTE AND CORRUPTION (D.O.G.E.)**—approximate savings of \$7 trillion **ANNUALLY**

The reports of the Department of Government Efficiency (D.O.G.E.) have radically exposed the sheer scale of state level, self-service. Applying

this standard of efficiency and cleanup to all governments worldwide, reveals a massive saving potential. By dismantling corrupt bureaucracies, leaking subsidies, and the covert financial streams of the cartel, the global population will save roughly \$7 trillion annually; funds that can never again be weaponized for the elite agenda.

3. **FREEDOM FROM THE CURSE OF INTEREST AND COMPOUND INTEREST**—approximate savings of \$14 trillion **ANNUALLY**

The fiat monetary system was pure debt spiral with a global mountain of debt sitting at an astronomical \$315 trillion. The service of interest and compound interest alone swallowed an estimated \$14 trillion every single year. This was money created out of thin air to siphon away real lifetime and labor productivity. With the disappearance of fiat money and the cancellation of all illegitimate debts, this artificial vacuum pump of the Deep State collapses. Global wealth is no longer decimated but multiplies within the new system.

4. **FREE ENERGY AND NEAR ZERO PRODUCTION COSTS**—approximate savings of \$10 trillion **ANNUALLY**

The final liberating blow occurs on the physical plane. The global energy market currently consumes around \$10 trillion per year. With the upcoming introduction of free energy according to Nikola Tesla and the release of suppressed patents, energy costs for households, industries, and logistics worldwide, will drop to near zero. Since energy is the primary driver for transport and manufacturing, the production costs for all consumer goods, food, and raw materials, will collapse simultaneously.

Abundance becomes the new global standard. The monumental overall picture of the new era compounding these factors, yields an annual liberation dividend of a staggering \$46 trillion. This equates to nearly half of the current entire global gross domestic product, which was previously siphoned off in secret, year after year.

This mathematical framework proves that the resources the money, and the wealth, were always there. They were merely artificially

suppressed to maintain control over the masses. With the upcoming transition, this colossal sum is unlocked. It forms the indestructible foundation for the Golden Age, a world where, poverty, hunger, and the financial struggle for survival, are legally and mathematically rendered history forever.
