## **DIED 10 DAYS AFTER RECEIVING 1<sup>ST</sup> ASTRAZENECA INJECTION**

Dr. Wright a child psychologist, husband and father passed away suddenly on January 26, 2021, following the AstraZeneca Covid-19 vaccine he had received around January 16, 2021, according to his Facebook profile.

Dr. Wright's wife Charlotte said he had experienced a significant brain bleed and suffered a cerebral venous stroke. He was then placed on life support and his organs were donated.

Update: [AUGUST 25, 2022](#)

## **WIFE OF NHS DOCTOR (32) WHO DIED AFTER TAKING ASTRAZENECA VACCINE AWARDED £120K VACCINE DAMAGE PAYMENT**

Ms Wright has attended and spoke at numerous 'freedom rallies' and protests against mandatory vaccination. She has claimed that mainstream media have prevented her from sharing her husband's story, but she is determined to do so through social media and media organisations which will give her a platform.
