

# THE POWER To Go.

**TAKE CHARGE OF YOUR DESTINY**

In a VMI Chrysler Mini Van.

# OUR GOAL Is To Help You Reach Yours

Certainly, ours is a business that relies on smart engineering, current technology and innovation. Yet, what truly lies at the heart of our company is an understanding of the unique and varied needs of our customers.

Since opening our doors more than 15 years ago, we've continued to explore new ways to develop the most reliable, highest quality and most easily accessible transportation in the world. Our van conversions begin with the finest vehicles on the market, each transformed to enable our customers to travel with comfort, convenience and peace of mind. Every conversion entails an extensive 11-step process, followed by a 200-point

inspection and road test. The finished product is covered by VMI's comprehensive warranty and maintains the original three-year/36,000-mile factory warranty.

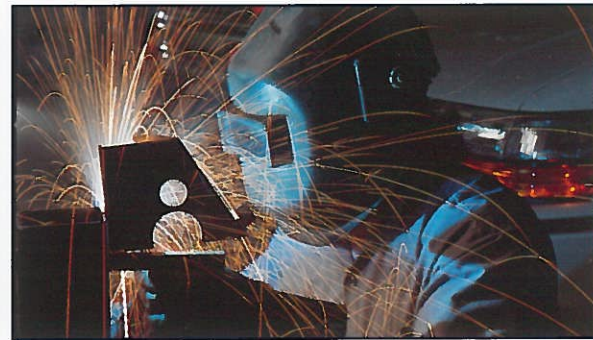

## **A line of products. A variety of choices.**

In addition to a selection of mini and full size van conversions, VMI offers a full line of interior and exterior mounted wheelchair and scooter lifts, platform lifts, and accessories, such as keychain remotes, removable foot rests, QRT restraint system and transfer seats.

## **A network of support to ensure your satisfaction.**

The 700-plus dealers in our worldwide Dealer Network receive formal training on all aspects of our conversions. They are dedicated to helping you select the van conversion, lift or accessory that will best suit your needs and budget, and to providing the highest level of service and maintenance.

# CHRYSLER MINI VANS

## QUALITY VANS FOR EXCEPTIONAL CONVERSIONS

Convenience, comfort and reliability.

Standard in every VMI conversion.

- Manual wheelchair tie-down system
- Emergency ramp release
- Fixed rear bench
- 3-year/36,000-mile warranty
- Fully crash-tested
- **Ample floor space (more maneuverability than ever before)**

## The Northstar — Powered In-Floor Ramp

Since it was developed in 1993, the Northstar remains the cornerstone of the VMI product line. With over 10,000 Northstar conversions in the field, this full-powered conversion features a 10-inch lowered floor with 58 inches of headroom for optimum comfort and convenience. And VMI's signature One-Touch remote system allows you to effortlessly activate this reliable in-floor ramp system and access an obstruction-free doorway—all with the touch of a button. The system also includes an easy-to-operate manual backup.

# MINI VANS

## TRANSFORMED TO MEET YOUR NEEDS

### The Northstar E-Series — Manual In-Floor Ramp

If you desire a simple, easily accessible, yet extremely economical means of transportation, the Northstar E-Series is the answer. It provides the same reliability and comfort as the Northstar in a fully manual design, making it the ideal option for those who have assistance accessing their vehicles.

The E-Series features the identical in-floor ramp, roominess and comfort of the Northstar, in the most affordable and practical mini van conversion available.

## The Summit — Powered Fold-Out Ramp

You won't find a better combination of ease and affordability. The Summit features a powered fold-out ramp system with easy manual operation that is unlike any other conversion on the market. Simple design, reliability and ease of use set the Summit conversion apart from its competition. In the Summit, you'll enjoy the best of both worlds — reliability and affordable convenience.

# OPTIONS

## TO SUIT YOUR LIFESTYLE

No matter which mini van conversion you choose, you can select from a number of options designed to make your travels easy and enjoyable.

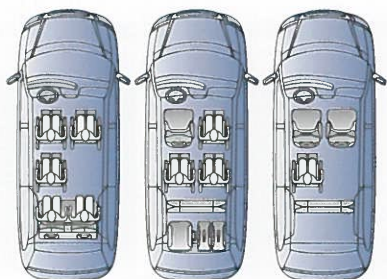

- Remote Control Entry – With the touch of a button, you can open your doors and activate the ramp system.
- The PowerKneel™ System – Operated by remote control, this feature gently lowers the vehicle to decrease ramp incline and increase accessibility. It operates quickly, quietly and has been rigorously tested to ensure strength and dependability.
- Removable Front Seat – Our removable seats are built on bases with rolling casters, making them easy to remove and lock back into place. They also are installed on footrests, simulating the original floor height for maximum comfort.
- Magnetic Entry – One touch of the keychain magnet against the taillight sensor opens and closes the door and lowers and raises the ramp. Not surprisingly, this affordable convenience is one of our most popular options.

Standard features and options are subject to change without notice. See your authorized VMI Dealer for a complete list of standard and optional features and available adaptive equipment.

### Seating configurations

VMI's patent-pending third-row seat design addresses one of the most common consumer concerns – storage space. Our design enables greater flexibility, so there is no need to compromise comfort or storage area.

### Maximum storage space

# ACCESSORIES TO MAKE TRAVEL A BREEZE

## **QRT restraint systems for added security.**

Your VMI products can include QRT Deluxe retractable securement systems, the simplest, most universal and, of course, safest retractable systems in the industry. Q'Straint® wheelchair and occupant restraint systems can be mounted on tracks, walls, swing arms, floors, seats, flip seats or barriers. These automatic restraints are protected by hard covers to prevent damage to wheelchairs and injury to passengers, and retract neatly out of sight when not in use. They will accommodate any type of seating arrangement and feature easy one-hand operation for optimum efficiency in the securing of passengers. Plus, they can secure a mobility aid in just ten seconds.

## **Power Transfer Seat.™ Effortless access to your vehicle.**

The six-way VMI Ricon Power Transfer Seat™ makes transfers from wheelchair to driver's or passenger's seat convenient, quick and easy. At the touch of a button, the fully automatic seat swivels 90 degrees to allow effortless access. Individual controls for height and front-to-rear travel give you complete control of your transfer. The Power Transfer Seat fits most full size and mini vans and is adaptable to most seats.
