

Rosalie Bingham For Congress CD4

Ensure Food Safety

Food as medicine is a rising concern as daily truth news reveals the toxic nature of a Congress who sold out the American people in 1986 by the National Vaccine Safety Act hijacking the GRAS list. This occurred by the Generally Regarded As Safe List being unlawfully used for medicine and for food. I vow to actively participate in **regulatory commissions reform responsible for Food Safety**.

Provide Energy Assurance

Carbon neutral solutions such as **Zero Net Waste Technologies** use anaerobic **Digesting** solutions are but one microgrid solution. **Energy Freedom** is **paramount** and enterprise initiatives to build energy assurance is my priority.

Protect Intellectual Property

Keeping America Great means capturing our technology for our best use, then sharing best practices, best solutions on our terms. **Improving our system of trade secrets protection for American Companies and enterprise with accountability** by plugging leaks with authentication of Foreign National sharing is key.

Rosalie Bingham's Objectives

Term Limits

HeartBeat Bill

Hand Up Not Hand Out

Rosalie asking for just one term

Friend,

I'm not a career politician, but I am asking for just one term to accomplish:

**Made In America Policy
Family & America First
States Rights' Enforcement**

Let me bring home to Nevada a new age of Political Accountability by being your voice of reason in Washington
