Model S Receives 5-Star Euro NCAP Safety Rating

WHAT

- Tesla's newest release of their Model S vehicle received a 5-Star Euro NCAP safety rating
- It was received by Tesla for the first time in 2014, where it was one of the few vehicles to achieve a 5-Star Euro rating and 5 stars in every NHTSA category
- Most recently, it was tested on the basis of how the vehicle will perform when required to protect passengers, given unfavorable road conditions, and test its crash-proficiency
- Additionally, the Model S also excelled in other competing areas such as a 98% in safety assist, 91% in Child Occupant Protection, 94% in Adult Occupant Protection and maximum points awarded in Far-Side Impact subsection.

WHO

- Euro NCAP stands for European New Car Assessment Programme
- Voluntary association for evaluating car safety performance
- Tesla is an American automotive company successful in their electrically powered products
