

TALK TO ME

Intuitive Animal
Communication
Made Easy

Richard Faragini

About Me

From a very young age, my great love of animals found me spending much time with them. I spent many years volunteering with humane societies and animal protection organizations, which contributed to my knowledge of animals.

After completing a workshop on animal communication my focus intensified.

I believe that everyone who shares their lives with an animal companion would love to know what they are thinking and what they would like to say.

Working with hundreds of animals and having thousands of experiences has deepened my experience. Communicating with animals daily has provided me with the expertise I now hold.
