Our Mission

Our mission is to provide high-quality surveys and evaluations for evidence-based decision-making. We are dedicated to the collection and analysis of high-quality data for international and national programs and building survey research capacity.

About Us

RISE International Consulting LLC, founded in 2022 is a woman-owned small business with a primary focus in designing and implementing quality surveys and evaluations. We work collaboratively with our in-country counterparts in implementing large scale population-based surveys—from survey design, data collection, analysis to dissemination. We also support program development and policy analysis. We are committed to building the capacity of researchers and institutions in implementing surveys and evaluations.

With a network of experts and subcontractors in over 30 countries, our globally based teams provide quality technical assistance from data collection to dissemination.

What makes us unique?

Hands-on Experience. We have extensive experience managing complex programs, including complex population-based surveys, and evaluations in permissive and non-permissive environments.

Program Management. We enjoy client confidence in the management of contracts, subcontracts, technical assistance, and high-quality deliverables.

Partnered Solution. We collaborate with ministries, statistical organizations, national commissions, private organizations, and research institutions, including universities, to create evidence-based solutions.

Value Relationships. We have experience working with bilateral and multilateral organizations including USAID, the World Bank, NASA Harvest, USDA, CDC the US Census Bureau, UNICEF, and WHO among others.

Comprehensive International Development Assistance. We provide training, capacity-building, policy analysis, toolkits, and templates for diverse sectors and cross-cutting areas.

Why work with RISE International?

...because **quality** matters

Gender & Youth

About the Founder

Dr. Kaur is the founder and Executive Director of RISE International Consulting LLC. She has over 25 years of leadership experience in managing complex population-based surveys. Her international experience includes surveys and evaluations implemented for the U.S. Agency for International Development's (USAID) Bureau for Resilience and Food Security (RFS) (Feed the Future Zone of Influence Surveys), Bureau for Humanitarian Assistance (Resilience Focus Zone Surveys), and Bureau for Global Health's Demographic and Health Surveys (DHS), AIDS Indicator Surveys (AIS), Malaria Indicator Surveys (MIS), and Micronutrient Surveys, and the Centers for Disease Control and Prevention's (CDC) Population-based HIV Impact Assessment (PHIA) surveys. Her U.S. domestic survey experience includes the CDC's National Health and Nutrition Examination Surveys (NHANES).

Dr. Kaur is a strategic leader and a skilled negotiator who has engaged with collaborating partners, including host country governments, from design to dissemination of surveys and evaluations. Dr. Kaur has built and managed various portfolios including HIV and biomarkers for DHS surveys, and Food Security and Survey portfolio that implements the Surveys for Monitoring in Resilience and Food Security (SMRFS) project. She also led the development of the Feed the Future Zone of Influence (ZOI) Survey Methods Toolkit for USAID/RFS.

Dr. Kaur has worked closely with USAID, the World Bank, NASA Harvest, USDA, the US Census Bureau, UNICEF, WHO, National Statistical Offices, private organizations in-country, and research institutions, including universities. Respected and highly valued by clients, colleagues, and subcontractors for management of contracts, technical competence, and high-quality deliverables, she has led surveys and evaluations in Angola, Botswana, Bangladesh, Benin, Egypt, Ethiopia, Ghana, India, Jordan, Liberia, Mali, Mozambique, Nepal, Nigeria, Rwanda, Tanzania, Thailand, Uganda, Uzbekistan, and Zambia—and provided technical assistance to over 70 surveys.
