ANOMALI

PROMO CODE

TPC24 = 32% exclusive discount across Anomali's product line
(prior to channel discounts).

Anomali is the leading AI-Powered Security Operations Platform for global enterprise organizations.

The Anomali Security Operations Platform is a cloud-native cybersecurity solution that automates the collection of threat data and drives detection, prioritization, and analysis, taking security from detection to remediation in seconds.

The Anomali Security Operations Platform includes:

Anomali Copilot

Anomali Copilot makes our Security Operations Platform the fastest and most comprehensive solution in the market—a generative AI solution based on LLMs using the industry's largest threat repository to mitigate hallucinations.

- Embedded Generative AI that decreases research time and increases the speed of threat investigation and response.
- Easy to use - no need for writing complex queries - provides NLP at scale.
- Enhanced decision-making, intel gathering, hunting, and blocking.

3 Levels Sold by Token Usage:
Essential │ Intermediate │ Advanced

> Pricing is based on token usage and starts at $83,000/yr

Anomali Security Analytics

The largest global repository of relevant IOCs and IOAs. Differentiates Security Analytics by correlating petabytes of relevant telemetry with intelligence to deliver meaningful insights in seconds.

- Cloud-native big data engine powers the fastest data, log, and telemetry search in the world.
- Perform investigation, triage, eradication, containment, and blocking.
- Instant correlation across millions of logs, IOCs, and IOAs.

> Pricing is based on ingestion and storage size, customized for each customer.

Anomali ThreatStream

The largest global repository of relevant IOCs and IOAs. Differentiates Security Analytics by correlating petabytes of relevant telemetry with intelligence to deliver meaningful insights in seconds.

- The largest global repository of threat intelligence.
- Organize all unstructured threat information into actionable data.
- Aggregate all your hot and cold data stores.

> Pricing is based on the company size, starting at $150,000/yr

Anomali Match On-Premise

Anomali Match is an on-premise, intelligence-driven extended detection and response (XDR) solution that helps organizations quickly identify and respond to threats in real time by automatically correlating ALL security telemetry data against active threat intelligence to stop breaches and attacks.

- Answer complex, difficult questions quickly and with confidence for greater visibility.
- Prioritize threats to increase efficiencies and productivity by immediately profiling a threat and its impact.
- Reduce the cost of security incidents and enable more efficient security operations.

> Pricing is based on the company size. We encourage customers to purchase our pre-configured appliances when buying Match on-prem - at 20K/appliance
