SABINETOWN PHILOSOPHER, CLAIMS

HE KNOWS THE REASON RUSSIA IS MAD AT US: THEY OWE US MONEY

Editor's note: The Sabinetown Philosopher on his Johnson grass farm on the Sabine River believes he knows what he's talking about in the following letter we received from him this week. We don't endorse or oppose his ideas, but print them as they come in, figuring there is less harm in printing them than in leaving them out and having him talk about us from one end of Sabine river to the other.

Dear editor:

I was out here on the Sabine Monday afternoon enjoyin the October sunshine and while some folks might have assumed I was loafin what I was doin was thinkin ahead and buildin up a supply of reserve energy to carry me through the winter days ahead, in fact sometimes I get two or three years ahead on reserve energy as in these days of shortages a man never knows what's gonna come up short next and only the thinkin man can keep afloat and well stocked, and I noticed the Bell on my trot line was a-bellin as I kept a bell on it as there ain't no use wastin your time and feelin of the line ever a few hours when a bell will do the same thing, and got up from where I was sittin and thinkin and pulled the line out of the water and didn't find nothin more interestin than a copy of the Dallas News hangin on a hook, which I had rather have had a catfish or even a gaspergou or a gar at the worst, but since it don't take no effort to read the thing I pulled it in and dried it out and read where the feelin between Russia and the United States ain't none too good and I believe I have figured out the reason.

Them Russian lenders are mad at us and I believe I know why. They

owe us money.

I seen where Russia, out of 11 billion dollars she borrowed through lend-lease from us durin the war ain't paid back but 2 million, and personally if I owed a man that much money and hadn't paid back no more than that I'd be mad at him too. In fact, getting it down in figures you and me both can understand. If you owed Hemphill Drug Co. a hundred dollars and hadn't paid em but 2 dollars on the account, naturally you'd be mad at em too and probably would take your business some where else and denounce em as a soul-less corporation.

It's a funny thing, but almost invariably when a man owes somebody somethin and can't or won't pay it, he gets mad at him, whereas ordinarily you'd think it would be the other way around, that the man the money was owed to would be the one entitled to get mad. Why the maddest my neighbor has ever been at me was one year when he owed me 12 dollars for help in him get his hay in one afternoon before it rained and he said his roof leaked and he lost the hay anyway, and just to show it works both ways "I got three or four neighbors and a dozen or so merchants in town I stay mad at all the time and have been since 1919 and will stay that way as long as they keep sendin me bills. When a debt gets a certain age it ought to be buried, especially if it's a debt to somebody else.

The way I see it, as long as Russia owes all us capitalists over here 11 billion dollars she's gonna stay mad at us. I know from experience.

Yours faithfully,

J. A.

How much light is enough
to read a newspaper?

IT'S good to settle down with your favorite newspaper when you have better lighting at your elbow for easier, smoother seeing.

Under modern lighting, you'll be seeing more and seeing faster without straining your eyes or inviting fatigue. And eye comfort is important. For reading or writing . . . wherever eyes are called upon to see quickly and surely . . . try a three-light lamp that brings you 100-200-300-watt lighting in a single bulb.

You owe it to your eyes to find out about better lighting now.
