

Questions – RFP for Fleet Vehicles

Questions Issued Date: June 9, 2025

RFP Closing Date: June 13, 2025, 12:00 PM CST

Purpose

The purpose of this document is to provide proponents information on any questions that have been received up until the question submission date of June 6, 2025. This information is to be used as supplemental information to the RFP issued on May 12, 2025.

Questions Received

- **Is there flexibility based on fleet availability on when the vehicle is received by SIGN?**

There is flexibility on when we receive vehicles requested in the proposal. Vehicles do not need to be provided all at once. The only requirement is that SIGN needs to have the funds out and vehicles provided by March 31, 2026.

- **Dealerships that asked for the VIN serial numbers of the vehicles were provided that information.**

- **For the ½ Ton truck, is it a topper or a box cover? If it is a topper, does SIGN need a light wired inside the topper?**

It is a topper, not a box cover. We do not need a light in it, but do need to be able to lock it. We do need it to be high enough to be able to load mowers with handles upright (our current topper is higher at the back).
