

HEADLIGHT & TAIL LIGHT PPF / TINTING CARE, MAINTENANCE & DRYING GUIDE

WFANZ Certified Member – WWFA369 | Qualified Installers | Professional Workmanship

Thank you for choosing Shady Tintz. Proper care and maintenance during the curing period is essential to ensure optimal appearance, longevity, and performance of your newly installed headlight or tail light film / PPF.

CURING & DRYING PROCESS

- Freshly installed films may initially show haze, moisture pockets, slight distortion, or a cloudy appearance.
- This is a normal part of the curing process and will improve as moisture evaporates.
- Drying and curing times vary depending on weather, humidity, film type, and sun exposure.
- Typical curing periods range from several days up to 4 weeks in cooler or humid conditions.

IMPORTANT AFTERCARE INSTRUCTIONS

- Do not pressure wash directly at film edges during the curing period.
- Avoid harsh chemicals, abrasive cleaners, bug removers, or polishing compounds.
- Do not pick, scratch, or lift film edges.
- Avoid automated car washes with aggressive brushes during the curing period.

CLEANING RECOMMENDATIONS

- Use only soft microfiber cloths.
- Use mild automotive soap or approved film-safe cleaners.
- Gently wipe surfaces without excessive pressure.
- Avoid ammonia-based cleaners or solvents.

WHAT TO EXPECT

- Minor edge moisture or small water pockets may be visible during curing.
- Film appearance may vary slightly under different lighting conditions.
- Small installation inclusions may exist within accepted industry tolerances.
- PPF and tint products may slightly alter light tone or appearance.

WARRANTY & PRODUCT CARE

- Failure to follow aftercare instructions may affect warranty coverage.
- Damage caused by misuse, impacts, pressure washing, chemicals, or improper cleaning is not covered under warranty.
- If you have concerns during curing, contact Shady Tintz before attempting any corrective action.

CUSTOMER ACKNOWLEDGEMENT

- The customer acknowledges they have received this care, maintenance, and curing information guide.
- The customer understands that temporary curing marks and moisture pockets are normal during the drying process.
- The customer understands that failure to follow aftercare instructions may affect warranty coverage.
