

"LIFE SAVING FINISHING RAIL CLEANER"

EXPANDABLE RECHARGEABLE BATTERY OPERATED CLEANING DEVICE SPECIALIZING IN CLEANING THE FINISHING RAILS INSIDE HOUSES, HOSPITAL ROOMS AND BIG BUILDINGS. IT HAS A SMALL SENSOR LAZER THAT SHINES A STROBE RED LIGHT ON THE FINISHING RAIL WHERE GERMS AND DIRT ARE WHEN YOU PUT THE DEVICE CLOSE TO THE RAIL. AS YOU MOVE THE DEVICE ON THE RAIL IT ROTATES VIBRATES AND MASSAGES THE AREA UNTIL IT IS CLEAN WITH A MOIST SPONGE THAT IS SUPPLIED FROM THE TANK YOU HAVE FILLED WITH CLEANING FLUID. WHEN THE DIRT IS GONE THE LIGHT GOES OUT AND THE DEVICE QUITS SPINNING. YOU CONTINUE ALONG THE RAIL THE SPONGE STAYS MOIST SUPPLIED FROM THE TANK. SMALL DUST CAN BE REMOVED WITH LIGHT PRESSURE WITHOUT THE DEVICE COMING ON AGAIN. HOWEVER WHEN THE LAZER DETECTS HARDER DIRT GRIME AND GERMS THE LIGHT COMES ON AND THE PROCESS REPEATS. THE REASON IT HAS THREE DIRECTIONS IS BECAUSE SOMETIMES DIRT WILL NOT COME OFF UNLESS THE SPONGE MOVES IN ANOTHER DIRECTION. AT THIS TIME APPLY MORE PRESSURE TO HELP THE VIBRATING SPONGE DESTROY THE GERMS AND DIRT. PUSH A BUTTON AND A SCRAPER EJECTS FOR UNREASONABLE CHARD THAT IS STUCK TO THE FINISHING RAILS IT STARTS VIBRATING WHEN IT TOUCHES THE GRIMY SURFACE. YOU ONLY HAVE TO STOP WHEN YOU NEED TO FILL THE CLEANING TANK OR RECHARGE OR CHANGE THE BATTERY, IT COMES WITH A ELECTRIC CORD IF YOU NEED ONE FOR BIG BUILDING NEEDS OR YOU CAN BUY EXTRA BATTERIES. THE SPONGE WRAP IS REMOVABLE AND WASHABLE AND YOU CAN BUY MORE SPONGES WHEN THOSE WEAR OUT.

I AM LOOKING FOR A GRANT SO I CAN HAVE A LICENSED MANUFACTURER AND DISTRIBUTOR SUPPLY THIS LIFE SAVING HIGHLY EFFECTIVE ENERGY EFFICIENT DEVICE.
