

Clinical Care & Dose Administration Aid Medication Training for Support Workers

AEGIS
Care Partners

Enhance your team's capabilities with Aegis Care Partners' one day training course —tailored for Home Care Providers and Associate Providers.

What does this course cover?

This specialised one day training course equips support workers with both practical and theoretical skills in clinical care and dose administration aid medication. Delivered by an experienced team of aged care trainers and clinicians, the course aligns with the scope of practice for each support worker, as agreed upon with your organisation's clinical representative. Our training strictly follows the guidelines of the Aged Care Quality and Safety Commission.

Who should buy this course?

Home Care Providers and Associate Providers who want to expand their clinical care capabilities.

This workshop is tailored for Home Care Providers and Associate Providers who offer clinical services and wish to enhance their clinical care capabilities through their support workers.

The training is designed to partner with the organisation's clinical representative to align it with their agreed scope of practice.

This one-day course can assist in upskilling your teams to deliver quality care.
