

WELL BUBBLER 10-120 EXTERNAL POWER INPUT WIRING DIAGRAM

NOTES

External DC power supply with output range of 14-24V and current rating >1A may be used. Medical-grade supply recommended.

External solar panel with operating voltage range of 14V-24V and power output range of 10W-25W recommended

Well Bubbler will charge from either integrated 10W solar panel, or from external DC supply source, whichever is greater.
