BEFORE YOU START...

The child reads the big, bold type.
This contains only the most common words, words that can be decoded or words containing the sound being learnt.

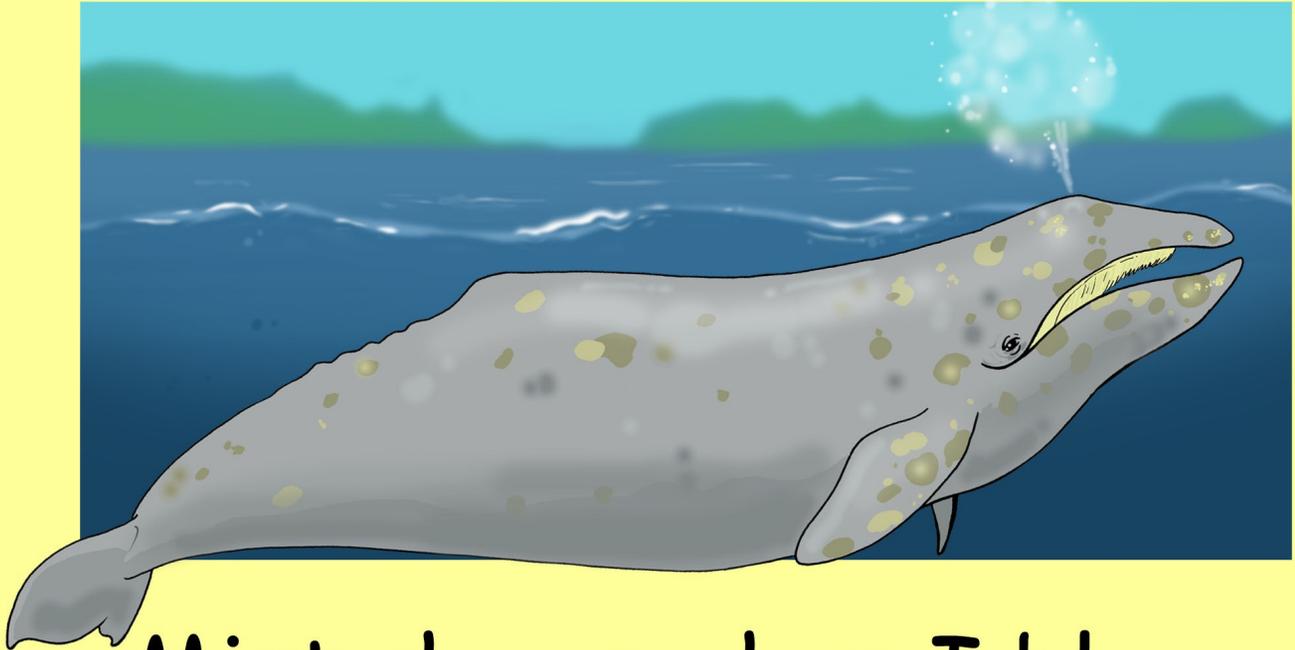

The text in the corner is just for the adult to read. This is to develop the child's vocabulary and to promote discussion.

ow

Say "ow" (as in "show").

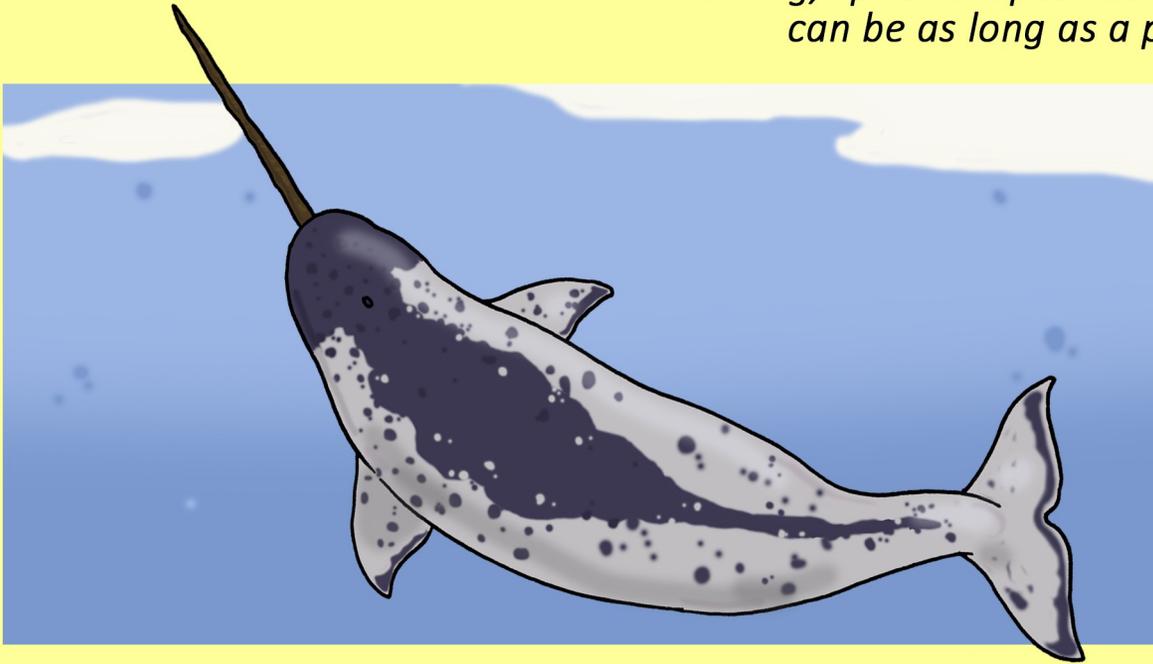

Say it **quiet**, say it **loud** and say it **silly**! Trace the letters with your finger... **Let's go!**

*Whales can be seen from far away
because of the mist that sprays when
they breathe at the surface.*

Mist shows when I blow.

The extraordinary looking narwal has a long, spiral-shaped tusk which can be as long as a person!

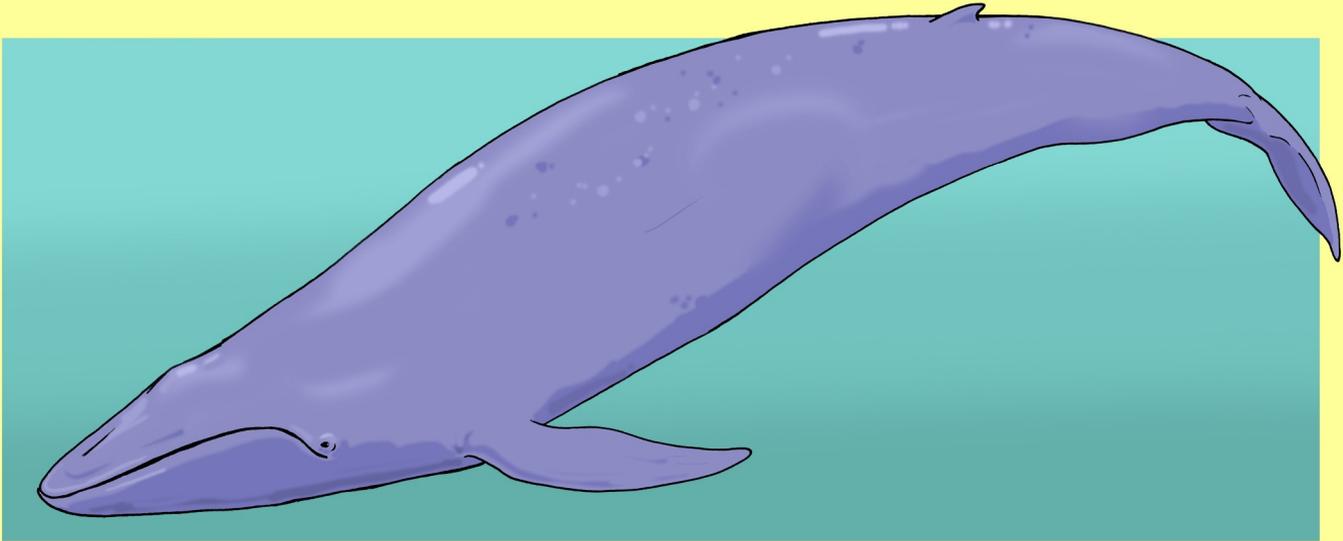

I own a long tusk.

The bowhead whale uses its large, blunt head to break holes in the ice so it can breathe.

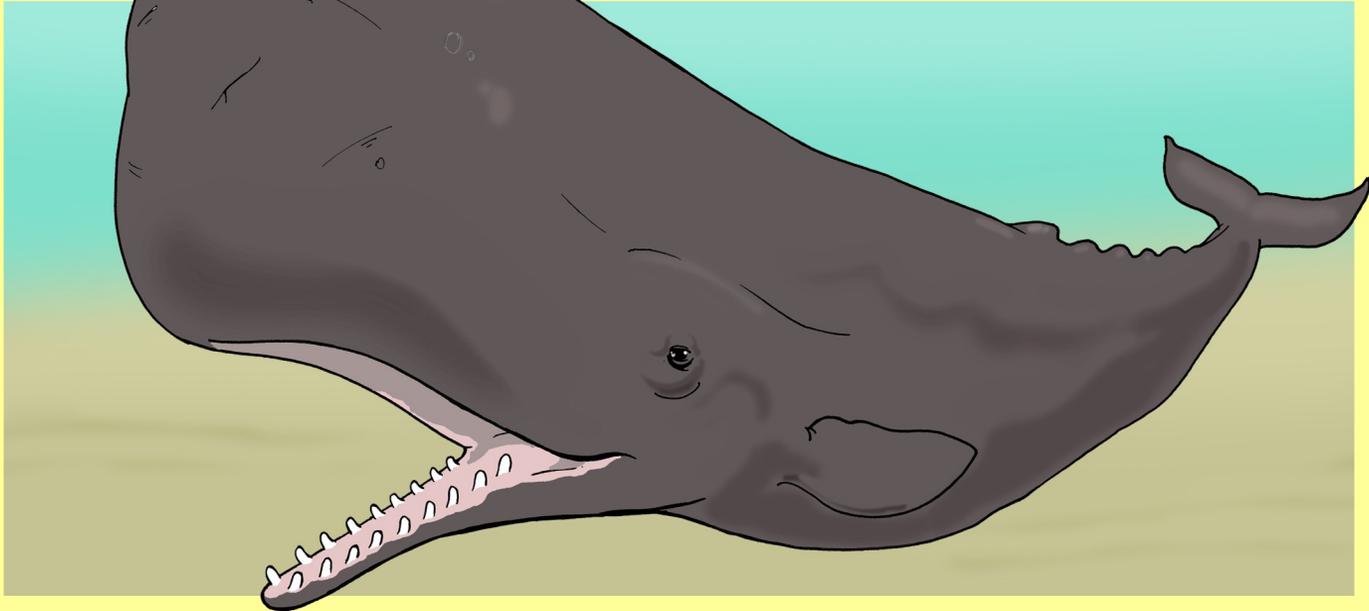

I lift up a window in the snow.

Blue whales are the largest animal to have ever existed. They can be longer than three buses!

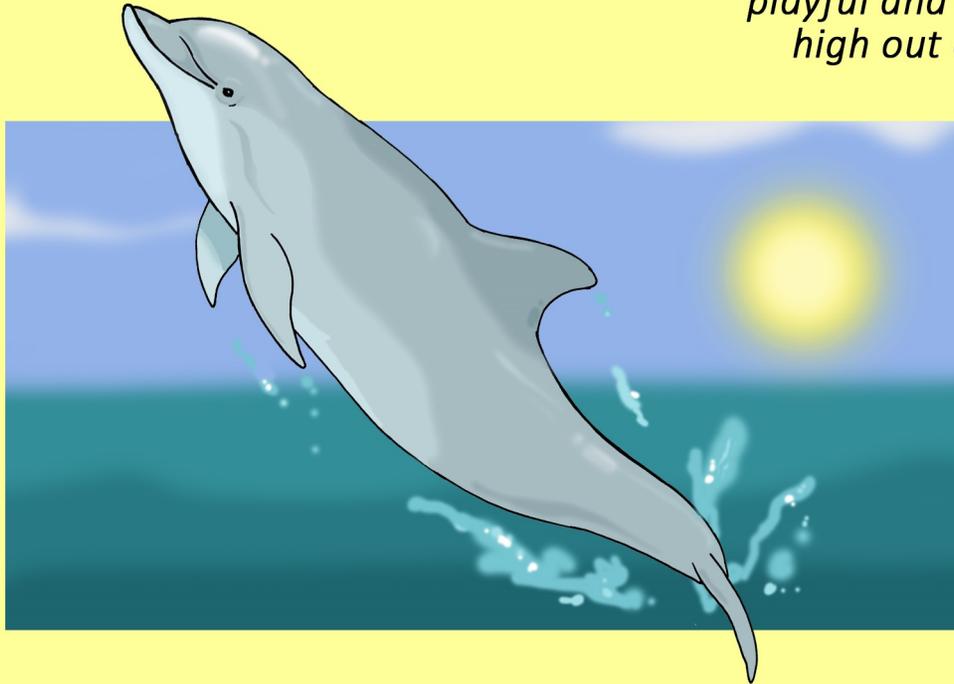

I will grow to be the biggest.

Despite diving deep into the ocean to find food, sperm whales also enjoy the warm shallow seas.

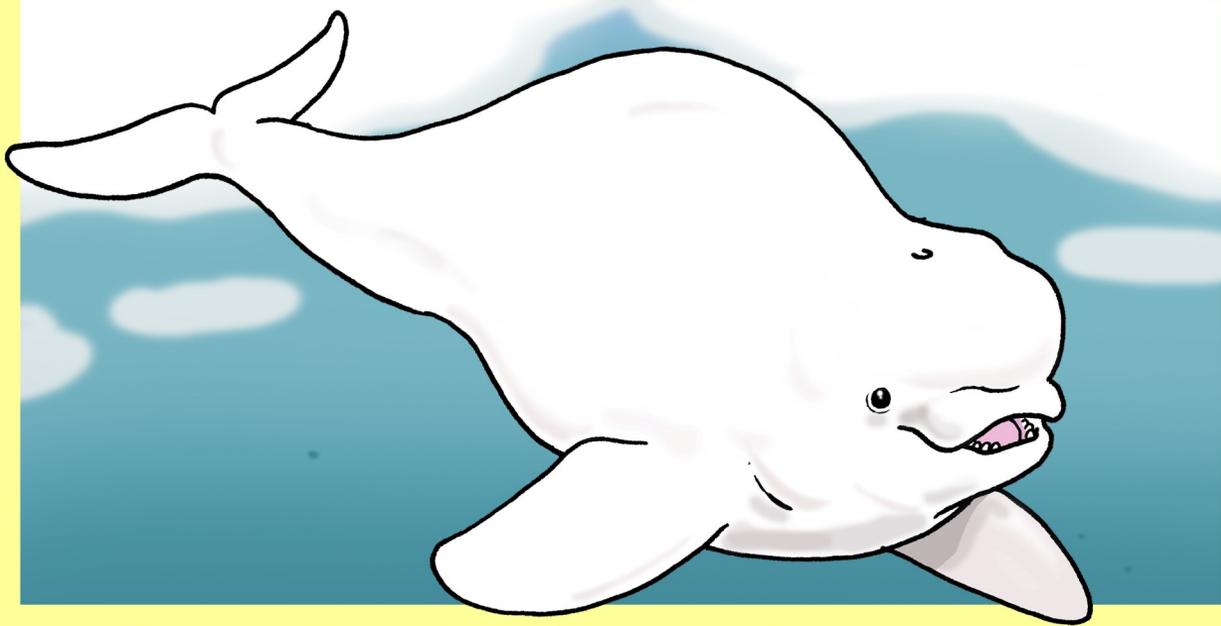

I rest in the shallows.

Bottlenose dolphins are very playful and love to jump high out of the water.

I will show you I can jump!

Like all whales and dolphins, belugas need air. They scrape holes in the ice with their teeth.

I swim below the snow.

Boto are river dolphins that live in the murky waters of the Amazon.

I follow the flow.

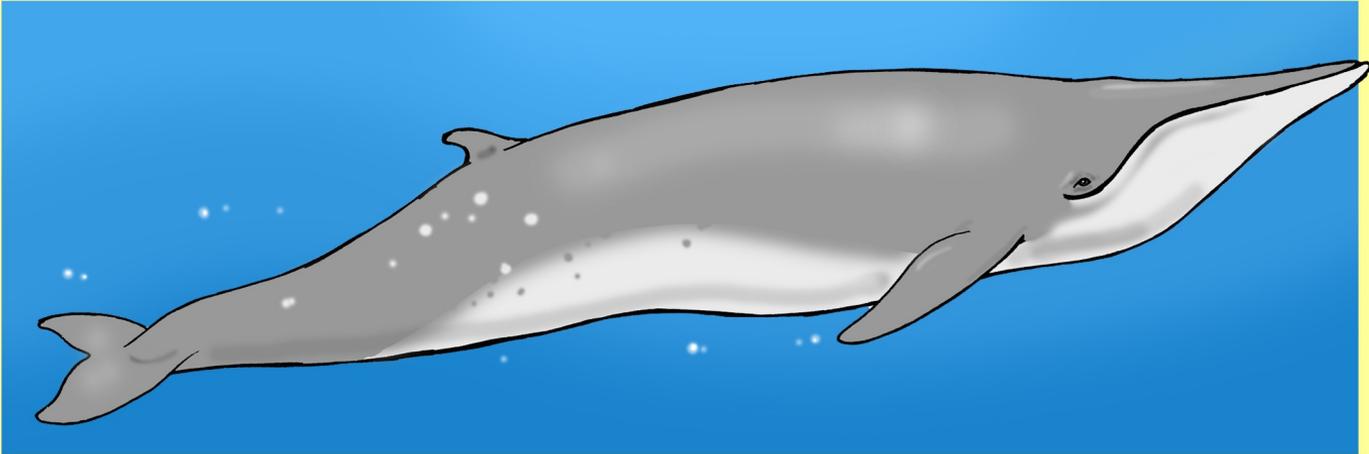

Krill form massive swarms and humpbacks take huge mouthfuls of these small creatures.

I can swallow lots of krill.

The sei whale is the fastest of all the great whales. It has a very streamlined body shape.

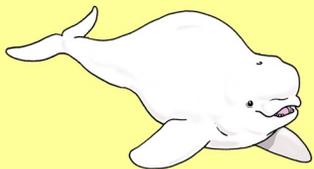

I swim fast. You can not follow me!
