

YelQuin

Halquinol 12.5%

COMPOSITION: Chlorohydroxyquinoline: 12.5%

INDICATIONS:

Poultry:

- As a growth promoter
- To prevent wet droppings
- Diarrhoea
- Increase body weight

BENEFITS:

- It is gut acting compound. It does not get absorbed in intestine hence it is non-toxic and no residues. Also it does not develop resistance
- It reduces the motility of the gastro-intestinal tract, causing longer transit time of feed through the intestine, thereby enhancing feed digestion and nutrient absorption
- It effectively increases weight gain and improves feed conversion
- It prevents and controls non-specific diarrhoea or wet droppings in farming birds/animals
- It is having wide spectrum, efficacy and safety

DOSAGE:

POULTRY:

As a Growth Promoter : 250-500g/ton of feed
or as advised by a Nutritionist

STORAGE: Store in a cool dry place, keep away from direct sunlight and keep the package tightly closed when not in use.

PACK SIZE : 25 Kg
