

Babies 0 to 12 mths

Our baby room provides a bright and stimulating environment for children as young as 6 weeks old up to 12 months old. The room has been designed to stimulate and cater for your child's rapid development through exploration.

The resources are carefully planned each day to promote learning through play. Each child's routine is individually discussed with parents and followed in the setting to create a home from home feel.

As babies grow we have toys that grow with them promoting physical development from sitting up, to crawling and then walking including access to their own age appropriate outdoor space.

The room has its own cot and beds for children to be able to sleep as discussed in their settling in plan

Tots 12 mths to 2 years

Our Tots room is spacious and engaging, in this room the children again have access to age appropriate resources and have planned activities each day to promote development.

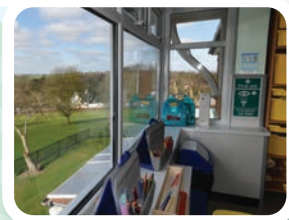

Toys and sinks in this room are at children's height to promote exploration and child choice. This room also has beds for all children to be able to have a nap when they need.

The children have their own play area with soft flooring

Toddlers 2 years to 3 years

Our toddler room consists of two rooms where the children can play and explore, at this age the children are potty and toilet training and are encouraged to use the toilets and sinks freely with help and support of the nursery nurses.

Our drink and snack station helps the children make healthy choices throughout the day outside of meal times. We believe this encourages positive eating habits along with the guidelines from 'Eat better, Start better'.

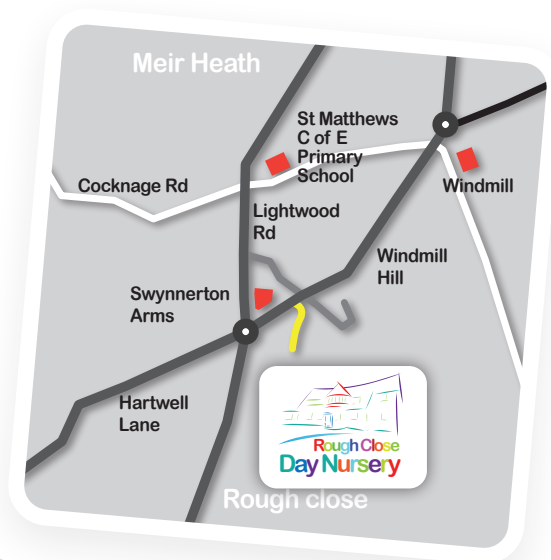

Preschool 3 years to 5 years

The pre-school is an important stage in children's early years for their development ready for their school years.

The children are encouraged to make their own choices about what healthy snacks they would like, helping prepare their snacks as a fun way of involving them in healthy eating food preparation.

There is still a large emphasis on children choosing their activities, but we encourage some more structure into their day this includes times set aside for phonics, reading and writing where age and stage appropriate.

The Nursery is very easy to find, we are on Windmill Hill opposite the Swynnerton Arms. Just turn in to the drive and follow round, you can't miss us!
