

Create stunning digital signage in just 5 minutes!

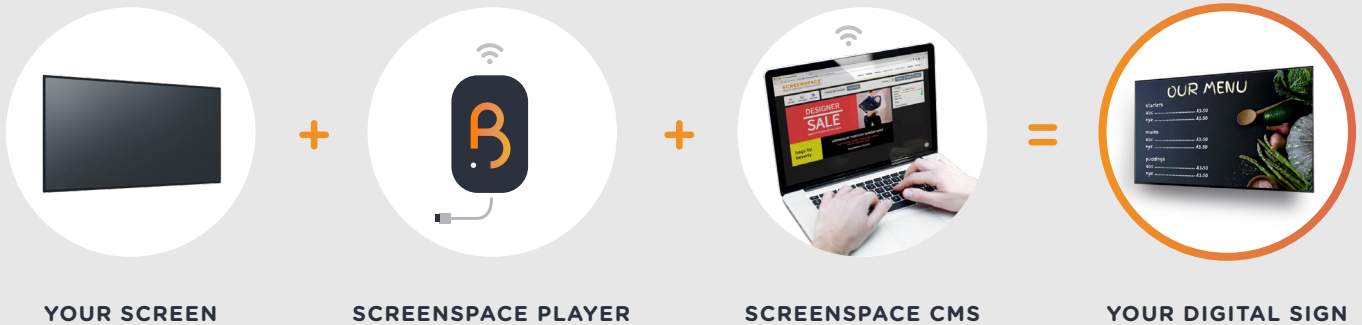

THE BENEFITS OF USING DIGITAL SIGNAGE:

- Significantly better visibility than traditional signage
- Powerful up-selling and cross-selling capabilities
- A fully customisable user experience
- A highly effective channel for communications
- Heightened brand perception
- Lower costs than traditional signage

SCREENSPACE MAKES DIGITAL SIGNAGE SIMPLE

Screenspace brings together everything you need to create professional digital signage — hardware and software — in one place. It's so simple to set up and use, you can be up and running in just 5 minutes straight out of the box—no fuss, no lengthy contracts.

TURN ANY SCREEN INTO A DIGITAL SIGN!

SET UP AND DISPLAY YOUR MESSAGES EFFORTLESSLY

Screenspace Freedom is a small, but powerful Wi-Fi enabled media player that fits easily into the palm of your hand and is gentle on your pocket. Designed exclusively for digital signage use, it can display full HD images, videos and text for maximum impact, plus the built-in memory means your adverts will continue playing, even if the Wi-Fi becomes unavailable. The Freedom player can be controlled remotely and provides a highly cost-effective and reliable solution to all your digital signage needs.

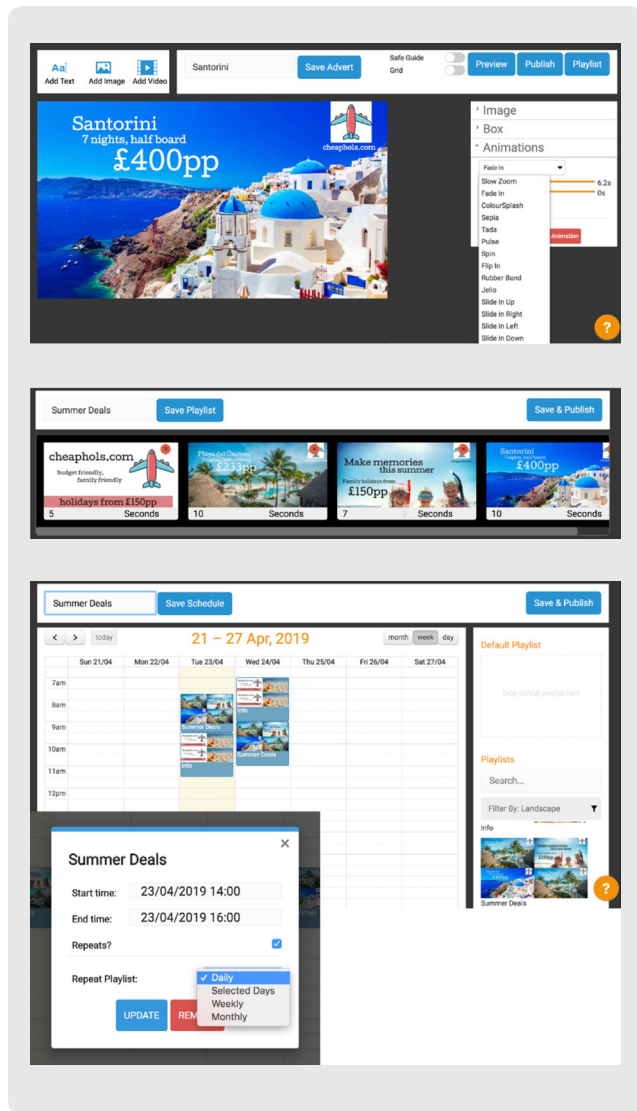

SCREENSPACE FREEDOM PLAYER FEATURES:

- 2.4GHz Wi-Fi connectivity
- 4GB internal memory
- Full HD output
- Connectivity to the Screenspace CMS and app
- Plug and Play installation
- USB power cable & 0.5m HDMI cable included

EASILY CREATE EFFECTIVE AND ENGAGING ADVERTS

Screenspace provides businesses with a simple, streamlined way of creating digital signage. The cloud based CMS features a range of tools to make designing effective campaigns easy. A variety of pre-existing templates are available, or users can create their own advert from scratch, then remote manage their digital signage anywhere in the world.

Customise your campaign

Users can easily upload images and videos from their computer for use within their adverts. All text and media is adjustable and can be scaled and moved freely. Animations can be utilised to make adverts eye-catching and engaging.

Utilise playlists

Users can create playlists to ensure their advertisements run seamlessly throughout the day. Simply drag and drop saved adverts into the preferred order and adjust the timings of each segment.

Scheduling made easy

Users can schedule their playlists to suit their needs. Simply drag and drop the chosen playlist onto the calendar, pick the date for the campaign to run and adjust the length of time accordingly. Users can then choose to repeat the campaign at the same time each day, on certain days or not at all.

Connectivity on the go

Internet connection is optional in order to use Screenspace. Download the free app for iOS & Android to edit and update adverts if there's no Wi-Fi network available.
