

**EVPOA**

**IMPERVIOUS COVER OR MATERIALS** means a surface that does not readily allow water to infiltrate into the ground. The term may include, but not be limited to, building roof surfaces including roof overhangs, concrete or asphalt pavement surfaces, compacted gravel and similar surfaces.

From the Eagle Vail Ratio as defined in the Eagle Vail PUD Guide

Single Family 55% impervious to lot max.

Duplex 55% impervious to lot max.

4-plex lot 65% impervious to lot max.

Multi family 65% impervious to lot max.
