Keys & pedals add 3' to depth.

For sale is the former organ of St. Patrick's R.C. Church in Watervliet, New York. The organ was disassembled by the Wallace & Company crew in 2011 with assistance from Schreiner Organs Ltd. The organ had been located in a large gallery in a very tall room. In the 1890's Jardine returned to enlarge this instrument by adding a third manual. This instrument was a favorite in the Troy/Watervliet area and many have fond memories of its beautiful sound. Please inquire for additional information about this organ.
