## MULTI SERVICES SOLUTIONS (MSS)

A family of companies to help start and grow your business. Regardless at what stage you are, we have a solution for you. Come to your one stop shop for your business needs.

There are 7 things that every business needs for legitimacy and for growth:

1. Must be incorporated (LLC, Partnership or Corp)
2. Must have a presence and be found. It needs a website that tells customers what it does and allows them to purchase their products and services online. At a minimum it provides information about what it does.
3. Needs a phone number that is registered to the business name. It gives it legitimacy.
4. It needs a designer for its logo and marketing materials for social media, their website and for printing.
5. It needs an accountant/bookkeeper for keeping them in compliance with the city, state and federal requirements. Including Payroll and Tax requirements.
6. It needs automation and security. Software systems, are a necessity for growth and to manage your operations. Then it is important to be vigilant of what goes on in your premises to protect your assets from bad employees and trespassers.
7. Video creation for delivering your message to your employees, prospective clients. Delivering training and meetings in a more receptive way.

These are but a few of the steps and must haves of a successful business.
