Our Mission Statement

Our mission is to provide a quality education in a healthy environment in the communities.

Our Goal

Our goals are for the children to be active, creative and develop sense of responsibility, understanding, and having compassion for others. We strive for each child to excel in the following intellectually, physically, emotionally, morally, and spiritually.

Community

We teach students how to become leaders in return they will lead and service their community.

*Help us provide
for our kids of Haiti.*

History

In 2010 Haiti was devastated by an earthquake. In 2013 our founder Jessie Theodore was compelled to action upon witnessing the devastation the earthquake caused.

Ms. Theodore was heart broken to see so many children displace. In the same year the Excellent Primary School, LLC; was established to help the most affected children and their parents.

The school began with 64 students and 3 teachers. At the present time the Excellent School, LLC; has almost 500 in attendance, 11 teachers, and 5 staff members. We also provide uniforms, school supplies, and meals. Medical services are provided since many families are unable to pay for these services.

An adult night school has been established as well parents are encourage to attend to learn how to read and write so that they can become self sufficient. In addition to the school Ms Theodore has also establish an orphanage in 2016 for children that have been homeless. At this present time the orphanage only accommodate 12 children due to the lack of space.

School & Orphanage

OBJECTIVE:

Support a sustained investment in education that will promote economic development and improve the quality of life in Haiti.

PROJECTED GOALS: 5 Year Projection (2015-2019)

- To have 700- 1000 students enrolled and attending the school by the year 2020.
- To purchase 2-50 passenger school buses to provide student transportation.
- To increase staff and personnel by 70%.
- To increase parental involvement by 80%.
- To build a school to accommodate student, classrooms, recreation space.
- Provide 99% clean water resources within the school community.
- Add on a gymnasium to promote sports and fitness education program.
- To promote family and student activities with family beach day, picnics, talent shows, etc.
- The school is non-profit organization which requires no payment from the families so there fore we require parents to provide their time and services in the form of volunteering hours.
- To dig a fresh water well on school grounds with the adequate manpower.
- To purchase and accept donations of farm animals and land cultivation equipment and materials in order to provide a proper agricultural education program to the students.
