CannaBuDs of Rhinebeck Single Source CBD Product Information

Generally speaking, for overall physical wellness, general aches and pains, and/or stress reduction, a consumable like a tincture is your best bet for regular use. Engaging the body's endocannabinoid system from the inside out allows the therapeutic compounds to go where the body knows they're most needed. For more acute joint or muscle pain, inflammation, or stiffness, topicals are probably what you're looking for. Sore wrist, stiff neck, bum elbow.... Massage some CBD Body Butter balm on it. The beneficial CBD will absorb through the skin and get right to the source of the discomfort. Compromised skin from minor burns, cuts, scrapes, rashes, sunburn, poison ivy.... Rub some CBD Medicinal Salve on it as often as needed. In terms of which product to start using, the stronger the better. Greater potency leads to more noticeable results. People who have had ineffective or underwhelming experiences with cheap CBD usually weren't taking a strong enough dose. CBD has no known toxicity or overdose risk. The only commonly reported side-effects from taking too much CBD are drowsiness and a state of deep relaxation.

CBD/CBG Full Spectrum Tincture 30ml –

1000mg CBD 500mg CBG

Our best seller and most referred item! Life is stressful, especially these days. Anxiety, worry, illness and chronic pain all contribute to overall inflammation throughout our bodies. While acute inflammation is an appropriate natural response to germs and injury, it is harmful to us if it becomes chronic. Our CBD/CBG infused Tincture gets right to the source. Having shown tremendous potential for reducing anxiety, calming the mind, menstrual cramps and contributing to physiological repair, our CBD/CBG tincture can improve your quality of life in a myriad of ways. Made in Connecticut, our tincture is made with our cannabinoid rich, full spectrum CBD/CDG oil and MCT oil derived from select coconuts. Flavorless, made with only three ingredients, and additive free, it can be used as a regular dietary supplement or only when needed.

How to use it.? Sublingually use 1-2 drops per 10lbs twice daily, or as needed. (30ml = 600 drops) Topically, use enough oil to cover the troublesome areas and massage it in. Keep out of reach of children.

1,000mg CBD Medicinal Salve

2oz

Medicinal Salve is a vitamin based topical salve made with premium CBD distillate, that is designed to aid in repairing compromised skin issues like minor cuts, scrapes and burns. Similar to bacitracin or first aid salve, the extra benefit of natural CBD speeds up healing time and reduces noticeable scarring. Our salve can also be used on your hands to alleviate soreness and pain caused by dry and cracked skin, just in time for the cold winter months.
