ABOUT US

Core Energy was built by industry leaders in the commercial solar and thermal energy space to address the need for specialized renewable energy systems. Our team of engineers, system designers, and construction professionals are adept in the assessment, modeling, engineering, and construction of building integrated renewable systems. We aim to be a resource in all stages of project development with stakeholders.

- TECHNOLOGIES
- Advanced Energy Storage
 - Solar Thermal Systems
 - Solar Photovoltaic Systems
 - Power Purchase Agreement
 - Ground Source Geothermal Systems
 - Radiant Heating And Cooling Systems
 - Building Automation And Monitoring Systems
 - Energy Efficient Boilers And Hot Water Heaters
 - Demand Charge Reduction Strategies And Systems

- SUSTAINABLE
ENERGY SOLUTIONS
- Feasibility Studies
 - Property Owner to Tenant Power Purchase Agreement
 - Property Assessed Clean Energy Financing
 - Solar Renewable Energy Credit Management
 - Solar Compliance Support For Title 24
 - Goal-Based Net Zero Energy Design
 - Professional Engineering Services
