SALE INFORMATION.

SALE DAY

Monday 15th April 2023

LOCATION

Glen Innes Showground

Torrington St, Glen Innes NSW 2370

Entry to the showground is via Torrington Street main gate

Truck entry via Hunter Street

INSPECTION OF SALE ANIMALS

Inspection Evening of Sunday the 14th (Please RSVP for Catering)
or Monday 15th from 10am

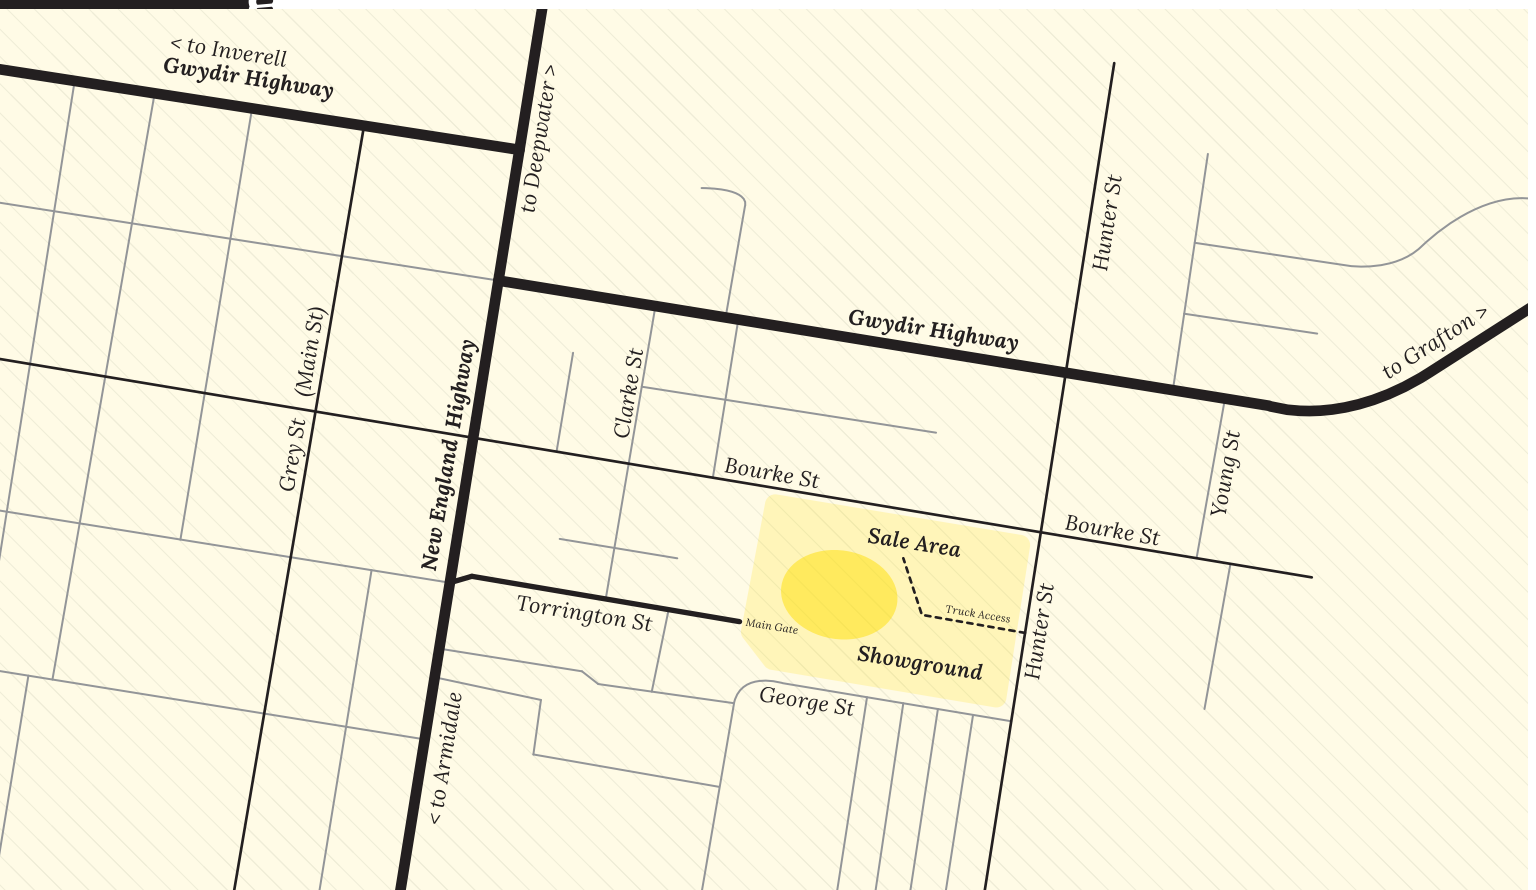

AUCTION

Monday 15th April 2024

Starting at 1:00 pm

FOOD & DRINKS

Lunch and refreshments will be available on the day

INSPECTION

The animals are available for inspection on Sunday evening from 4pm or from 10am on sale day. We encourage inspection of Battalion Livestock on property prior to sale day by appointment. This gives you the opportunity to view the animals in their natural environment and possibly inspect other animals in the pedigree to assist you in making your decision.

BUYERS REGISTRATION

The Buyers number system will be in operation. All prospective purchasers are asked to register prior to the sale.

ONLINE & PHONE BIDDING

If you are unable to attend on the day, the sale will be conducted in conjunction with Elite Livestock Auctions. Please refer to page 4 for further information. Phone bidding can be arranged through Colin Say & Co or your preferred agent. There is good Mobile Coverage in Glen Innes.

VISITOR SAFETY

All of the sale cattle have been screened for temperament and are quiet under normal circumstances, **however visitors enter the cattle pens at their own risk. Children/Prams must not enter the sale pens.**

DISABLED ACCESS

Disabled access is available at the showground and into the stands at the sale yards.

OUTSIDE AGENT REBATE

A rebate of 2% is offered to outside agents who introduce buyers to the selling agent in writing at least 24hrs prior to the sale and settle accounts on the purchaser's behalf within 7 days of the sale.

GST

All animals are sold exclusive of GST. GST is added to your invoice.

TRANSPORT

Carriers will be available on sale day. If you wish to bring your own truck, we will accommodate the release of your animal at the completion of the auction. All animals need to be transported from the sale venue by 5pm Tuesday the 16th of April 2024 unless prior arrangements have been made with the vendors. Formal possession, risk and expenses pass to the buyer at the fall of the hammer.

We recommend having a quiet animal (e.g. cow, steer etc.) yarded and ready to greet your bull/female when they arrive home to minimise stress on the animal and help it adjust to its new environment.

INSURANCE

Your animals are a valuable and vulnerable asset to your business. We highly recommend insuring your new purchase at the completion of the sale.

Insurance will be available on site.

All lots will be sold under the Australian Livestock & Property Agents Association Ltd Standard Stud Stock Auction Terms and Conditions of Sale. If unfamiliar with these terms, please contact Colin Say & Co.

DISCLAIMER

All reasonable care has been taken to ensure that the information provided in this catalogue is correct at the time of publication. However, the vendor and the selling agents do not assume any responsibility for the correctness or accuracy of the information provided. It is advised to seek independent verification of any information contained in this catalogue before relying on such information.

The vendors and agents are willing to provide assistance for those seeking guidance on the sale animals. However, the final decision is that of the purchaser and it is recommended that the purchaser either inspect the cattle thoroughly on sale day or at private inspection before the sale.

QR CODES.

Wherever you see a QR Code, scan it with your smart phone to be taken to the extra content.

Please bring your catalogue to the sale.

DNA GENETIC TESTING KEY.

Myostatin	F	Myostatin Gene FREE (NT821F)
	C	Myostatin Gene CARRIER (NT821C)
Coat	RGF	Red Gene Free
	RGC	Red Gene Carrier

	HH	Homozygous Horns
Leptin	CC	Normal marbling & fat accumulation tendencies
	TT	Increased marbling & fat accumulation tendencies
	CT	Marbling and fat accumulation tendencies between that of CC & TT

COLOUR PATTERN GUIDE

Speckle Park Cattle have 4 distinctive Colour Patterns; Speckled, Leopard, White & Black.

The speckle and leopard colour patterns are genetically the same except for varying degrees of spot and pattern. Some Speckle Park cattle can produce red colour patterns if both parents carry the recessive red gene. It is important to understand how the colour patterns are inherited in order to achieve your breeding goals. Please remember that this is a guide only and individual results may vary.

HERD HEALTH & EBV'S.

The sale animals have been treated with the following and we strongly recommend annual boosters to ensure their health is maintained:

FEMALES

- Vaccinated with 7 in 1
- Vaccinated against Tick fever
- Vaccinated against 3 Day (Bovine Ephemeral Fever)
- Multimin
- Vitamin B12
- Selovin
- Nilzan
- Brute
- ADE
- DNA tested negative of being persistently infected of Pestivirus (Bovine Viral Diarrhoea Virus). We recommend vaccination for pestivirus if you are not a clean or closed herd.

BULLS

- Vaccinated with 7 in 1
- Vaccinated against Tick fever
- Vaccinated against 3 Day (Bovine Ephemeral Fever)
- Multimin
- Vitamin B12
- Selovin
- Nilzan
- Brute
- ADE
- DNA tested negative of being persistently infected of Pestivirus (Bovine Viral Diarrhoea Virus). We recommend vaccination for pestivirus if you are not a clean or closed herd.

BULLS

All bulls come with a 6 month fertility guarantee. In the case that a bull is found to be incapable of natural service or infertile within 6 months from the date of sale, excluding sickness or injury, the vendor will replace the bull with another of comparable value, or provide a credit of the purchase price excluding interest, costs & damages, less disposal proceeds to the buyer, to be used within 12 months. In the case of a fertility claim the purchaser will need to provide a veterinary certificate stating the nature of the problem and that it was not a result of illness or injury. All bulls have fertility tested and passed a crush side veterinary examination.

FEMALES

All females are sold as guaranteed breeders. In the unlikely event that a female cannot be bred after being serviced by a fertile bull in the 6 months from the date of the sale or by the time the female reaches 22 months of age, the vendor will replace the female with another of comparable value or provide a credit of the purchase price excluding interest, costs & damages, less disposal proceeds to the buyer, to be used within 12 months. In the case of a fertility claim the purchaser will need to provide a veterinary certificate stating the nature of the problem and that it was not a result of illness or injury. All females have been palpitated to ensure the soundness of their reproductive tract. PTIC females have been confirmed pregnant by a qualified Veterinarian at the time of sale, post sale abortions will not be covered by the vendor nor shall there be a guaranteed live calf. Females are guaranteed to be fertile breeders for natural service, no females are guaranteed to flush successfully.

SEMEN/EMBRYOS

- All lots are offered for domestic use only, they are not eligible for export.
- All embryos sold are Grade 1
- The purchaser is responsible for all insurance, shipping and handling.

Genetic lots will only be released after payment of the invoice has been made. At the fall of the hammer all storage fees of the genetic lots is the responsibility of the purchaser.

All genetic lots are stored at Castlereagh Artificial Breeders Bendemeer.
Contact: Margaret Sheddan 0408 498 922 or info@castlereaghab.com.au

To obtain a conception rate guarantee on embryo packages the purchaser will be required to:

- Use suitable recipients (as determined by Battalion Livestock)
- Implants take place within 1 year of the sale by a licensed embryo technician (recommended or approved by Battalion Livestock)
- Pregnancy tests are performed by a qualified technician between 45-60 days after the implant date.

THESE CONDITIONS OF ELIGIBILITY ARE BEST DISCUSSED WITH BATTALION LIVESTOCK PRIOR TO ANY EMBRYOS BEING TRANSFERRED

Conception Rate Guarantee:

2 Embryos =	1 Pregnancy
3 Embryos =	1 Pregnancy
4 Embryos =	2 Pregnancies

If the Agreed Success Rate has not been achieved, the purchaser may claim on the guarantee by supplying to Battalion Livestock their licensed technicians transfer sheets and pregnancy results together with evidence that all relevant conditions have been satisfied by no later than 90 days after the implant date. Battalion Livestock will provide one replacement embryo per non pregnancy below the Agreed Success Rate of the same genetic combination or an agreed comparable genetic combination subject to availability. Or provide a credit to the value of purchase price less the confirmed pregnancies excluding interest, costs and damages, to be used within 12 months. The purchaser will have no further claim against Battalion Livestock.

It is the buyers responsibility to promptly insure their purchases according to their needs.

INSIGNIA Company

Insignia Co. provides customised marketing merchandise specialising in trucker hats!

As cattle breeders ourselves we understand your industry

WWW.INSIGNIACO.COM.AU

 @insigniacompany  @insigniacustomcompany

 admin@insigniaco.com.au  02 6734 4134

WELCOME TO OUR SECOND SPECKLE PARK SALE.

Wow the last 12 months have flown by and we now find ourselves at our 2nd Annual sale.

Looking back the cattle market went through a drop through the latter half of 2023 with unfavourably climatic conditions being the biggest contributing factor for the decline in the market. We certainly felt these effects and up until the last couple weeks of 2023 were looking at one of the driest years in almost 100 years of record keeping on our property. Thankfully, the drought broke, and the rains fell over the Christmas period which was the best gift of all. As we write this, the rains have started to fall consistently, and the vast countryside has seen a dramatic improvement the cattle market has started to find its legs and quickly bounced back. The current market appears to be the calm before the storm though as many of the experts have indicated favourable conditions are building for the perfect storm for the beef industry to push the boundaries once again and possibly reach new records over the next couple of years.

At Battalion Livestock we have a strong focus on breeding industry relevant animals that can develop above average Eye Muscle Areas (the top dollar cuts) whilst constantly working on improving Intramuscular Fats to ensure our genetics can meet the top specs required to achieve premiums plus also have the capacity to carry as many kilograms of high-grade beef as possible. The animals offered in this sale have been bred to add power, performance and profitability whilst maintaining strong maternal traits to ensure we are supplying high end self-replacing seedstock.

We hope that you will notice the style of cattle we are producing, have extra shape and volume and have the consistency in their pedigrees to go on and bred true to type. As seedstock producers our success is measured by our clients' results, we sincerely encourage any of our clients or prospective buyers to stay in touch with us and come and spend some time with us in the paddock discussing the animals and genetics. We can all learn from each other and having a friendly open dialogue is something we place the utmost importance on. Breeding cattle for showing purposes is not our focus, we are purely commercially driven with our breeding objectives and many of our best decisions have been germinated whilst standing in the paddock strategically analysing cattle and calculating the pros and cons of every genetic breeding decision.

We would like to thank everyone who has expressed interest in our program and hope you can join us on sale day. There has not been a better opportunity in recent times to secure elite genetics at respectable prices and know that the market will be on the rise again increasing the value of any seedstock investments you undertake now.

Grant, Kylie, Travis, Grace & Hailey

OUR HISTORY.

I'm a 4th generation cattle producer and it may be said I was born with a love of cattle in my veins. Some of my fondest memories as a child revolve around cattle, from having purchased my first stud cow (Hereford) at the age of 14 to registering my own stud back in 2006 and now conducting a yearly Hereford Bull Sale. Whilst I have always loved Herefords and always will, I carefully studied the Speckle Park breed since its introduction into Australia with great interest. After a lot of research the Battalion Speckle Park stud was registered in 2016 after the purchase of 8 frozen embryos from Six Star Speckle Park resulting in two bulls and two heifers. The two bulls went on to sell at the Scone multi-vendor sale for the top vendor average of \$22,000 and setting the sale record for a bull that still stands today at \$26,000. The two females were retained as foundation donors with one of them, Heartbreaker M1 now being regarded as one of the breeds top producers in the world, with progeny sales currently grossing over half a million dollars and still increasing. Our great matriarch has given us many highlights and several Australian and World Records. She has produced the current world record priced female for \$100,000 (to Ivery Downs Speckle Park), A son that held the Australian record at \$45,000 (to Celamba Speckle Park), a world record for Embryos at \$5050 each (to Toebelle Speckle Park) and another of her sons has the Australian record semen price at \$860 per straw (sold by Ivery Downs Speckle Park).

We started breeding Speckle Park cattle to diversify our breeding program and run a second breed side by side with our Hereford stud. The natural thickness and carcase merit drew us to the breed. We've always had a strong focus on breeding cattle with extra thickness and structural correctness whilst maintaining a strong emphasis on constitution and temperament. We have found our Speckle Park cattle tick those boxes and allow us to breed industry relevant animals that can perform and match up competitively in the current market. Prior to our inaugural sale last year, we had been improving our genetic base and marketing our stud bulls and females at the Scone multi-vendor sale with great success.

We run a small intensive Speckle herd of females that have been selected to have the ability to consistently produce elite quality calves. With embryo transfer we are able to continually match our top females to the best bulls in the world and consistently breed calves that meet our breeding goals. My wife Kylie and I make a good team, her background in Veterinary Nursing and Graphic Design compliment well on both the cattle and marketing sides of the business. We now have a full house of cattle enthusiasts. Travis, Grace and Hailey all love cattle as much as we do and there are many debates on which cow is better. We are passionate about producing seedstock and pride ourselves on our customer service.

Grant Kneipp

ACM 23E

We generally don't rush into using too many new sires as we prefer whenever possible to use proven sires. We had been hearing good reports about Andchris Extreme's calves so then decided to give him a go. The wait was well and truly worth it! Our top bull this year is one of his sons. Check out Battalion Eclipse T218, we will definitely be using him again in our flush programs this year.

RAVEN MEADOWS MAGNUM 10N (SPECKLED)

 MAINSTREAM ELDORADO E11 (ET) (P) (WHITE)
 Dam: **SPKNZ H2 (P) (WHITE)**
 SPKNZ E36 (ET) (P) (SPECKLED)

A bull with breed-leading growth and weight in his progeny. Commercial farmers are asking for bulls that have explosive high growth. We used Premier Logic to add growth and carcass weight into our commercially relevant bull breeding program. This is the sire that breeds the larger framed cattle if you are chasing heavier finishing weights.

A & W 15R (P) (LEOPARD)
 Sire: **HS UNTAPPED 3A (SPECKLED)**
 NOTTA 2R PRETENDER 4T (P) (SPECKLED)

MULTIMIN EVOLUTION has been shown in scientific studies to improve cattle health, fertility, and productivity.

MULTIMIN®

WHEN IT MATTERS

IMPROVED FIRST CYCLE CONCEPTION RATE

Multimin Evolution has been shown to improve the first cycle conception rate by **UP TO 19.4%**.^{1,2} Conception in the first cycle can lead to an additional 20 to 40 days for calves to grow.

IMPROVED PREGNANCY RATES

Pregnancy rates in breeding females treated with Multimin Evolution are up to **12% HIGHER** than untreated females, depending on the length of the breeding season and breeding method.^{1,2,4}

IMPROVED SPERM QUALITY

Bulls treated with Multimin Evolution 90 days before joining had **22% HIGHER** sperm concentration and significantly more motile sperm than control animals.^{2,10}

Undoubtably one of the best and most exciting heifers we have breed to date. Physically this heifer is super impressive, with tremendous width through the back end whilst being proud and elegant up front, a very powerful female that remains feminine and mobile. This is a heifer with the potential to do great things for any program. On paper she is equally as impressive with her raw data and excellent with EBV's. Make sure you inspect this heifer in the flesh as she will surely exceed your expectaions. Maternal sister to Lots 26 and 27.

4.

TAKE YOUR PICK FOR A 50% GENETIC PARTNERSHIP WITH BATTALION LIVESTOCK

Here's the opportunity to secure a 50% genetic share partnership with Battalion Livestock. Be the successful purchaser and take your pick out of our top five T drop retained heifers (BAT T65, T66, T68, T72, T76). These heifers have been selected as the elite performers for specific traits that we are looking to take us into the future. The successful bidder has the unique opportunity to select which heifer they would like to own a 50% genetic ownership in and develop a mutually agreed breeding strategy for that heifer moving forward. The selected heifer will remain at Battalion to be flushed on farm 2-3 times in between each natural calf. All resulting embryos will be divided equally (purchaser to share flushing fees and semen expenses). Finer contractual details to be confirmed before being issued the sale purchase invoice. ***If this opportunity interests you please make contact prior to sale date to further discuss a potential partnership that is mutually beneficial and agreed upon.***

This is the perfect bull to lead off the bull line up. Ledger T200 is a very correct and versatile top sire prospect being Homo polled, Red Gene Free and a Myostatin Non-Carrier. He is mobile and free moving with smooth shoulders and even muscling. He also scanned the highest raw IMF for the bulls in January. Ledger's pedigree just enhances his credibility being sired by one of the breeds greats in River Hill Line Drive and out of Heartbreaker M1 who has been one of the breeds most influential breeders and has accumulated over \$600,000 worth of sales to date from her own progeny and embryos alone! We have collected semen for commercial use by a dairy client only. Full ET brother to Lot 24, maternal brother to Lots 5, 25, 28, 31, 33 and 36 (just look how dominant the dam is in this offering).

Battalion ECLIPSE T218, remember that name. This guy has all the attributes of a game changer. An outright performance powerhouse! Big and powerful with great structure and balance, big time eye muscle and hind quarter expression and he ticks one of the most important boxes (but sometimes hard to do with this much power), big IMF. He is unique for the breed with his loose soft skin and tremendous depth of body. It's this softness and capacity that has continued to allow him the ability to outperform his contemporary group and lead the way with his performance-based measurements. Not to forget the importance of maternal traits, his dam Pho Finish P145 is a reliable fertile donor with arguably the best udder in our herd. Eclipse T218 has all the traits our program is targeting when breeding cattle for the beef industry. This breeds future is only restricted by the cattle we represent it with.

Another great example of a Heartbreaker M1 son, she is hands down the most consistent producing female we have ever owned or seen. We are impressed by Enforcer T226's correct structure, he stands on a wide square base with natural head elevation and extension that ultimately gives him great mobility and should be a big positive for longevity. One of his best traits though would easily be his exceptional testicular development which he commonly shares with his other ET brothers Lots 28, 31 and 33. He also has a full ET sister Lot 5 who is one of the elite heifers in this sale.

Looking to add kilograms to your program? Landlord T227 will be your bull. He is long and strong and will breed true to type with both his sire and dam consistently breeding the same style. Heartbreaker R12 is one of our largest framed mature cows and has the bonus of short gestation. If you want to see the consistency in this female have a look at her daughter (maternal sister to Landlord T227) Lot 3 who is arguably our best heifer in this sale.

Dam: **CODIAK GNK 53W (P) (Leopard)**
CODIAK NICE LADY RKW 25N (Leopard)

Heartbreaker BAT R14 x Codiak End to End 802E. We have doubled down on depth of body with this combination. Heartbreaker R14 would be the closest match in body type to her dam the great Heartbreaker M1. End to End 802E is still relatively fresh to Australia.
