ThinkShield

OUTSMART CYBER ATTACKS
ON THE FRONT LINES. IN REAL TIME.

Your end-user devices can be the most vulnerable part of your data ecosystem. Relying on legacy anti-virus solutions are not enough to combat the evolving threat landscape and consume unnecessary device resources. The ThinkShield Security by Design approach makes a difference for end-to-end protection for your users. We deliver solutions that protect against various threat vectors across all endpoints.

Lenovo customers now have the ability to purchase devices with SentinelOne, delivering real-time prevention, ActiveEDR, IoT security, and cloud workload protection powered by patented Behavioral AI. By combining industry-leading Lenovo devices with industry-leading endpoint security, it fortifies your front lines of defense against cyber attacks with seamless single-agent integration to provide silent user experience and super security.

The average attack lives undetected for for more than

95 DAYS

Autonomous Endpoint Protection

SentinelOne replaces legacy anti-virus with AI-powered protection:

• Device heals itself and rolls-back to a clean state autonomously

• Single agent model

• Zero reliance on internet connectivity or human intervention

Self-Healing ActiveEDR

SentinelOne's patented behavioral AI monitors and maps all device processes:

• Proactive actions to stop and remediate any attack at machine speed

• Threat hunting, storyline forensics, and granular remediation data available for IT teams

Extreme Ease Of Use

Consolidate multiple device agents down to one and manage with ease in a user-friendly console:

• Suite capabilities include: device control, endpoint firewall control, application inventory, vulnerability mapping

• Visibility to all managed and unmanaged network assets

Fully Integrated

As a critical part of ThinkShield, licenses can be purchased along with Lenovo hardware.

Additionally, SentinelOne has more than 300 configurable APIs with more than 60 native integrates into cybersecurity and IT operations technologies.
