Vanderbilt University Social Networks, Aging, and Policy Study (VUSNAPS)

CONSENT TO PARTICIPATE IN RESEARCH

You are **ELIGIBLE** to participate in this research study on personal networks being conducted by Professor Tara McKay at Vanderbilt University.

The following information is provided to inform you about the research project and your participation in it. Please read this form carefully and feel free call or email us with any questions you may have about this study and the information given below. You will be able to print or save a copy of this consent form.

Key information about this study

The purpose of this study is to understand the different kinds of personal relationships that older lesbian, gay, bisexual, transgender, nonbinary, and gender nonconforming adults in Tennessee, Alabama, Georgia and North Carolina draw on to provide physical and emotional support and to examine how life events like marriage, job change or retirement, illness, and relocation affect those relationships.

Participation in the study involves the completion of **three 60-minute online surveys** over approximately 4 years. The risks of the study to you are minimal and there are no direct benefits to you for taking part in the study. This is not a medical intervention or clinical trial. You will be compensated for your time. Throughout the study, the information you provide in study documents will be kept confidential and will not be linked to

your name or other personally identifying information.

You do not have to be in this research study. You may choose not to be in this study and get other treatments without changing your healthcare, services, or other rights. You can stop being in this study at any time. If we learn something new that may affect the risks or benefits of this study, you will be told so that you can decide whether or not you still want to be in this study.

Procedures to be followed and approximate duration of the study

If you agree to be in this study, we will email you a link to a web-based, self-administered survey that you can complete at your convenience. In the survey, you will be asked to complete a questionnaire about the people you consider your friends and confidants, who you would rely on in case of illness or hardship, and the kinds of activities in which you participate and consider important. We will also ask you about more private things like your physical health and mental health. The survey should take about 60 to 90 minutes to complete.

About 12 to 18 months after the initial survey, we will survey you again regarding the same topics to see what, if anything has changed, and how you have adapted to this change. There will be a third survey about 12 to 18 months after the second, with about the same content and length as the first and second interviews. You do not have to participate, and even if you agree at first, you can always change your mind and drop out. There may also be opportunities to participate in additional surveys. Prior to each survey we will ask for your consent to participate.

Participation in this study will involve a total of about one hour at each of the three waves, or 3 hours total of your time over the next 3-4 years. Because we wish to survey you at subsequent dates, we will also periodically take steps to maintain contact, via email, a phone call, or US postal mail.

consent_02 (consent)

Vanderbilt University Social Networks, Aging, and Policy Study (VUSNAPS)

CONSENT TO PARTICIPATE IN RESEARCH - CONTINUED

Description of the discomforts, inconveniences, and/or risks that can be reasonably expected as a result of participation in this study

While completing the survey, some participants may raise questions about their coping styles, available resources, or health behaviors. At the end of the survey, if you feel at any time that you would like more

information on health education, medical care, or stress reduction, we can provide a referral to an appropriate community organization. Please be advised that we are required to follow up directly with participants who report certain mental health issues such as thoughts of suicide and self-harm.

Confidentiality

All efforts, within reason, will be made to keep your personal information in your research record confidential but total confidentiality cannot be guaranteed. Your name will never be attached to your survey answers. No one outside the researchers will be able to connect answers to participant names. If results of this study are published or presented, individual names and other personally identifiable information will not be used. Please be assured that we take precautions to minimize any risk associated with data security, such as encrypting and protecting all files. Your contact information, which we will gather just so we can get back in touch, will also be safeguarded with the same level of security.

As with all research, there is a chance that confidentiality could be compromised; however, we are taking several precautions to minimize this risk. If any of the research questions make you uncomfortable, **you are free to decline to answer any questions you don't wish to answer, or to stop participating at any time.**

Retaining Research Records

After you have completed the last survey, your personal contact information will be destroyed. We will save the survey data for use in future research studies, but your identity will not be attached to your answers in order to protect your privacy.

consent (consent)

Vanderbilt University Social Networks, Aging, and Policy Study (VUSNAPS)

CONSENT TO PARTICIPATE IN RESEARCH - CONTINUED

Compensation

In return for your time, you will be paid \$40 for completing the first survey, then \$50 for the second survey in about 12 to 18 months, and \$60 for the third survey, about 12 to 18 months after the second. A check will be mailed to you within 6 weeks after each survey. The first time you complete the survey, there will be an additional incentive for referring friends or acquaintances that complete the survey. You will receive \$5 per eligible, complete referral.

Good effects that might result from this study

There is no direct benefit to you from taking part in this study. It is hoped that the research will help individuals and policymakers understand what is important for managing the kinds of changes occurring in life that can be stressful. There are no costs to you for this study.

Study Results

At the end of each survey, you will be asked if you would like to receive study updates via email or mail. Study updates will include information on study findings, dates for the next survey, and information on new studies as appropriate.

What happens if you choose to withdraw from study participation?

You are free to withdraw from the study at any time.

Contact Information

If you should have any questions about this research study, payments, or possibly injury, please feel free to contact:

Sergio Garcia, Study Coordinator: (877) 932-0614 or vusnaps@thehennegroup.com
(mailto:vusnaps@thehennegroup.com)

Tara McKay, Vanderbilt Investigator: 615-343-4631 or vusnaps@vanderbilt.edu
(mailto:vusnaps@vanderbilt.edu)

For additional information about giving consent or your rights as a participant in this study, to discuss problems, concerns, and questions, or to offer input, please feel free to contact the Institutional Review Board Office at (615) 322-2918 or toll free at (866) 224-8273.

Please check one of the radio buttons below to indicate your consent.

STATEMENT BY PERSON AGREEING TO PARTICIPATE IN THIS STUDY

I have read this informed consent document and the material contained in it has been explained to me verbally. All my questions have been answered, and I freely and voluntarily choose to participate.

Please click here (https://survey.usc.edu/vusnaps/wave1/vusnaps_consent_main.pdf) print or save a copy of this statement for your records.

a2a_intro

As the last time we surveyed you in [()], the main goal of this study is to understand people's social relationships. In this survey, we'll be asking you to tell us about the people you know now.

- You'll tell us a first name and maybe also the last initial or a nickname, just so we can tell who is who.
- Some people you might want to name just once, others several times. Some you may have named in the last survey, too.
- Please be sure to give us names or nicknames of specific people, not categories of people.
- All the names will be kept strictly confidential.
- Please enter all individuals separately. For example, enter two members of a couple on two lines and list out members of your family instead of writing "family" in the box.

a2a (marital status)

We start with some basics. First, are you currently married, widowed, divorced, separated, or have you never been married? (We will ask about other kinds of relationships shortly.)

- 1 Married
- 2 Widowed
- 3 Divorced
- 4 Separated
- 5 Never married

End of if

g0h (delayed or forgone getting medical care because of the cost)

During the past 12 months, have you delayed or forgone getting medical care because of the cost?

1 Yes

2 No

g0i (delayed or forgone getting counseling or therapy because of the cost)

During the past 12 months, have you delayed or forgone getting counseling or therapy from a mental health professional because of the cost?

1 Yes

2 No

g0j (delayed or forgone filling a prescription to save money)

During the past 12 months, have you delayed or forgone filling a prescription because of the cost?

1 Yes

2 No

Group of questions presented on the same screen

g1 (overall health)

Now let's talk about your health. Would you say your health is excellent, very good, good, fair, or poor?

1 Excellent

2 Very Good

3 Good

4 Fair

5 Poor

g1b (health in 10 years)

Using a scale from 0 to 10 where 0 means "the worst possible health" and 10 means "the best possible health," what do you expect your health will be like in 10 years?

RANGE 0..10

End of group of questions

g7 (have any conditions)

Has a doctor ever told you (not just in the last year or so) that you had any of these conditions? Check any that apply to you.

- 1 High blood pressure or hypertension
- 2 Diabetes or high blood sugar
- 3 A heart attack, coronary heart disease, angina, congestive heart failure, or another heart problem
- 4 Asthma or another breathing issue
- 5 Arthritis or rheumatism
- 6 Depression, anxiety, or another mental health condition
- 7 Cancer
- 8 Stroke
- 9 HIV
- 10 No -- None of the above

if 1 in g7 then

Group of questions presented on the same screen

g8a_1 (taking medication blood pressure)

In order to lower your blood pressure, are you now taking any medication?

- 1 (YES) Yes
- 2 (NO) No

g8a_2 (under control blood pressure)

Is your blood pressure pretty much under control or is it still a problem?

- 1 Under control
- 2 Still a problem

k10e_intro

In talking to people about elections, a lot of people are not able to vote for various reasons (e.g., they weren't registered, sick, lacked time, requested but did not receive absentee ballot). Which of the following best describes you for the **first** four US Presidential elections that you may have been eligible to vote in?
