

Community Visionaries & Supporters...

Every successful & progressive community needs a facility where students, athletes, retired folks, and community members can strive to improve their physical & mental condition through recreational activities.

The [Springs Rec Center](#), located at the Wessington Springs Elementary and attached to our current gymnasium, would offer a second gymnasium, fitness facility, additional locker rooms, restrooms, kitchen/concessions area, and ticket window. It will also be handicap accessible, as well as possess an overhead door for the events that need it. Community events, tournaments, academic activities, concerts, the science fair & robotics, weddings, funerals, & reunions could be accommodated at this facility.

A structure such as this will provide a gateway for economic growth and wellness to our already active and vibrant community!

With Wessington Springs currently having one gymnasium, our student athletes & musicians of all ages have very limited practice times and inconsistent schedules, therefore posing strenuous schedules for our youth and their academics. During the winter months when our young students cannot go outside due to low temps, they have no place for recess without hindering Physical Education class, both of which are of upmost importance to the students and teachers. In the evenings throughout the year, the school tries their best to accommodate community events that need to take place in the current gym, further affecting the schedules of student athletes.

A fundraising campaign has begun to build this facility for our community. We are asking for you to consider contributing as an individual, family, organization, business, or memorial gift. Your contributions would be tax deductible. While any contribution is sincerely appreciated, recognition will be given to contributors in the categories listed on the attached letter.

The Springs Rec Center will be a source of pride for many generations to come, and we are asking you to help make this vision a reality...***NOW IS THE TIME!***
