QUALITY OF OUR PRODUCTS

Beyond a stellar attention to customer service and excellence in engineering, we at **STATIC ENGINEERING** ensure that the utmost in quality is applied to all means of production, supplying and exporting of all our material handling Equipments. To deliver quality products:

We perform alignment of trolley and crane wheels, levelling and measuring, analysis of results, strength calculations for safe operations of crane.

We provide Testing Certificate for all the crucial parts required for the all type of cranes.

In-house Testing Capabilities for up to 150-200 tonnes.

INTERNAL QUALITY AUDITS

One of the best ways that we can get across our attention to quality to someone considering our services is not just through our words; but through the strict accreditation of internal quality audits that come with being ISO 9001:2008 certified. ISO 9001:2008 means Companies that are accredited with this certification have been strenuously and continuously audited as regards how their qualitative product is being created and engineered. The International Organization of Standardization has many strict requirements that a company must satisfy in order to receive this certification, of which the following apply:

- ✓ Procedural conduct for all key processes in the business.
- ✓ Process monitoring for effectiveness.
- ✓ Maintaining internal records.
- ✓ Reviewing output for defects with corrective action where necessary.
- ✓ Reviewing on a regular basis individual processes and quality system to ensure that the optimum efficiency is obtained.
- ✓ Striving towards improvement at all legs of the company's existence.
