

Fast & Accurate Identification of meat Species by LAMP PCR

Sugenomics meat species detection kits allow reliable testing of cooked products.

LAMP

Loop Mediated Isothermal Amplification (LAMP) is a novel approach for gene amplification technology

1 More sensitive and faster than Real Time PCR

To keep you well informed and confident according to food regulations.

Chicken / Turkey / Beef / Pork / Sheep / Goat / Horse / Donkey

2 Easy to apply

applicable with any qPCR machine

accurate, sensitive, repeatable results

3 applicable to various materials

raw, processed or cooked meats

kabab, ball, sausage, salami, cocktail sausage and square rolls

4

Flexible

a minute amount of meat sample can be measured with any of our species testing kits
