*35th Annual Spring Bull Sale*  
**FRIDAY, APRIL 18, 2025**  
**1:00 PM MT**  
**FAITH LIVESTOCK AUCTION • FAITH, SD**

Dear Cattle Ranchers,

Welcome to our 35th Annual Spring Yearling Bull Sale.

As you look through this sale offering, we hope you will see we are trying to raise bulls with balanced traits from maternal to carcass. This offering of bulls has 11 new A.I. sires to our breeding program for you to choose from, and our foundation herd sire, Sitz Traveler 8180. These bulls are all from our A.I. program. We realize that there are a lot of black bulls out there. However, we want you to be able to choose your bulls with confidence, and know exactly what you are buying. We use all the tools and technology that are available to us through the American Angus Association in raising these bulls. Every bull we sell is registered and has been DNA tested through Angus GS to verify parentage and improve the accuracy of their EPDs. Each registration number that these bulls carry is packed with information to help you in your decision making. If you have any questions, please feel free to call. You are always welcome to stop by the ranch to view the bulls before the sale. Videos can be viewed at our website, [PineCreekAngusRanch.com](http://PineCreekAngusRanch.com), our Facebook and YouTube pages, [FaithLivestock.com](http://FaithLivestock.com), and [DVAuction.com](http://DVAuction.com).

We hope to see you on sale day. However, we realize that is not always possible, so there are a couple ways for you to bid online. Please, make sure you are registered at [CattleUSA.com](http://CattleUSA.com) or [DVAuction.com](http://DVAuction.com) prior to sale day. You can view the bulls in Faith at the sale barn the afternoon before the sale or come early on Friday to look over the bulls and join us for lunch.

The sale starts at 1:00 PM MT.

Thankful for our many Blessings,

## American Angus Association \$Value Indexes

### Maternal Weaned Calf Value (\$M)

is an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

### Beef Value (\$B)

is an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

### Combined Value (\$C)

is an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.
