

# Logic Model

**Goal:** To have service dog organizations working with veterans diagnosed with PTSD address recovery from problematic substance use, by using evidence-informed practice, with specific attention to substance use and distance peer support in their training programs.

**Inputs:** Project Team Partners SUAP Funding CIHR Funding In-kind Contributions

**Activity:** Creation of knowledge products

**Activity:** Creation of learning opportunities

**Outputs:**

- Modified AUDEAMUS curriculum

**Outputs:**

- 3 infographics
- 3 peer reviewed articles
- 4 conference presentations
- Resource tool kit

**Outputs:**

- Community of Practice created
- 4 webinars developed & delivered
- 4 One Health Day community & media events

**Immediate Outcome:**

- Service dog organizations access evidence-informed knowledge products.

**Immediate Outcome:**

- Service dog organizations access evidence-informed information through participation in learning opportunities.

**Activity:** AUDEAMUS uses the modified curriculum with project participants.

**Intermediate Outcomes:**

- Service dog organizations use evidence-informed information on substance use to change policies, programs & practice.

**Intermediate Outcomes:**

- Veterans in the project use knowledge and skills gained, taking positive action with respect to substance use and use of distance peer support.
