

Unique Modular Business Model Scales Cost Effectively

- ❖ Olympus AI USA provides a **turn-key sovereign private cloud solution** with an **AI applications marketplace** that can be deployed at existing private cloud providers or through a private **Installation Joint Venture** managed by Olympus AI.
- ❖ Installation Joint Venture partners take advantage of the **flexible deployment model** in each market starting with a single 248 GPU cluster and **scaling into additional clusters over time** as demand increases.
 - Installations invest in GPU infrastructure and on-site costs with operations provided by Olympus AI managed services.
 - Olympus AI delivers a lower operating structure through services shared across Installation Joint Ventures.

Flexible Deployment Model – In each Market, our solution can be deployed to scale in ½ cluster increments inside an enterprise’s private on-premise facility, at an existing private cloud infrastructure provider, or through a private Installation Joint Venture managed by Olympus AI.
