Program: Municipal Infrastructure
Funding Source: U.S. Department of the Treasury
Coronavirus Capital Projects Fund

Villages / Towns / Cities: Village of Sherburne,
Town of Sherburne, and Town of Columbus
County(ies): Chenango

New York Region: Southern Tier
Assembly District: 121
Congressional District: 19
Senate District: 53

Total Locations: 574
Construction Miles (Fiber): 65
Wireless Hubs: N/A
Square Mileage (Wireless): N/A

Project Summary

The Village of Sherburne in partnership with the Town of Sherburne and the Town of Columbus will connect more than 550 locations across the two towns with an advanced, software-defined network that allows residents to choose among multiple internet service options with the click of a mouse. Building on its Sherburne Connect pilot project and its longstanding capabilities as a municipal electric utility, the Village will connect the locations with a fiber optic line and the equipment and FiberSpark and FyberCom will provide the internet service, with more service providers able to add service on the network at no additional cost to the project or subscribers. The 65 miles of new fiber will increase the resilience and sustainability of the pilot network. The municipal internet service will help the towns address the economic, health, and educational needs of their residents.

Service Offerings

100/100 Mbps \$49.45/month

1000/1000 Mbps \$69.45/month
