## Earthboard tree shelters

Earthboard tree shelters are an environmentally-friendly alternative to the traditional plastic products used to protect young trees and shrubs out in the wild.

They are made from a special water-proof cardboard which is 100% recyclable, 100% biodegradable and PLA free.

Earthboard tree shelters are perfect for anyone planting trees. Once the tree is established enough to no longer need it, they can either be recycled (it's repulpable) or left to biodegrade.

They will last around three years in the wild, depending on the planting conditions and location, but there's also a cost saving, as there's no need to collect them. Eventually they will disintegrate and return to the earth.

Earthboard tree shelters are available in different sizes, ranging from 17.7 in x 2 in x 2 in up to 59.1 in x 3.9 in x 3.9 in.

As they are supplied flat-packed, there are significant cost savings to be made on transportation

**Made from special water-proof cardboard**

**Biodegradable and PLA free**

**Recyclable**

**FSC® certified**

**'Green' alternative to plastic sapling / tree shelters**

**Can be supplied plain or custom-printed (subject to MOQs)**

**No need to collect - board will eventually just disintegrate**

**Supplied flat-pack, reducing transport costs**

**Easy and lightweight to carry out to planting sites**

**A quick and easy 'no ties' staking system**

**ONLINE:** We sell Earthboard tree shelters on our website [www.fieldandfare.co.uk](http://www.fieldandfare.co.uk) - sized 0.6m and 1.2m.

**STAKES:** Simple to use staking system which can be popped into place.

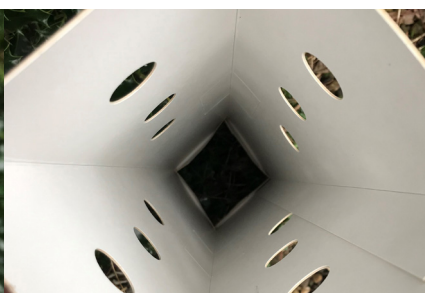

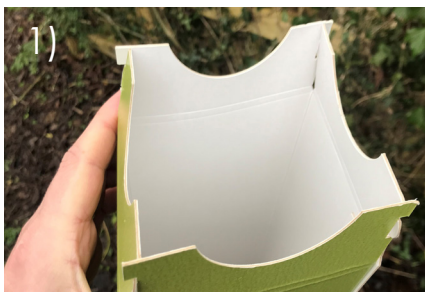

**EASY TO CARRY:** Lightweight and easy to move out to planting sites.

**REDUCE TRANSPORT COSTS:** Supplied flat-packed, which means we can fit up to 2000 units per pallet.

## Assembly

**EASY TO ASSEMBLE:** The base simply folds and clicks into place. Just push in the 2 sides without tabs (picture 2) and then the 2 remaining sides, until the tabs click into place. Then turn the tree-guard back the right way up and you're ready to go...
