1.0 INTRODUCTION

The herbal supplements created by Golden Sunrise Nutraceutical are designated as a Regenerative Medicine Advance Therapy (RMAT) by the Food & Drug Administration (FDA). The FDA formed a new department called Regenerative Medicine Advance Therapy because of the law enacted by the 114th United States Congress in December 2016 called the 21st Century Cures Act. These herbal supplements are able to penetrate the cells at the cellular level without any disruption or damage to the cells because they are recognized as food. This food provides the cells with the necessary building blocks for the cells to repair and rejuvenate themselves and flush out the accumulated toxins in the cells. They provide the building blocks for the cells to transform the crippled metabolic pathways back to the normal condition and allow the cells to perform the normal functions which they were designed to perform. *Serious or Life-threatening* conditions are either modified, reversed or cured (Cures Act p.180).

Golden Sunrise Nutraceutical products and treatments improve genetic *Telomeres* for cellular regeneration which increases the overall-health of the body and can increase human longevity.

2.0 INDICATIONS AND USAGE

The administration of herbal (botanical) *CANCER Plan of Care* treatments for human health has led to the benefit of cancer treatments from plant based materials. *ImunStem*, *Aktiffvate*, *KemoHerbs*, and *AnterFeerons* treatments have been of great value to patients that only use herbal / botanical products for overall health. This has led to improved outcomes for patients.

CANCER Plan of Care treatment begins with the use of *ImunStem* and *Aktiffvate* to improve the immune system function. Then the administration of *KemoHerbs* are given to flush the system and attempt arresting the development of the cancer. The treatments are continued in order to support and attempt elimination of cancer cells.

FIRST AND FOREMOST, *IMUNSTEM*, *AKTIFFVATE*, AND *CANCER Plan of Care*, MUST BE ADMINISTERED UNDER THE SUPERVISION OF A PHYSICIAN'S CARE. Once a medical evaluation of the patient has been completed and reviewed, those patients whose medical history and current medical condition is appropriate for treatment with *CANCER Plan of Care* will receive the product as follows:

3.0 INSTRUCTIONS FOR THE TREATMENT

Before starting the *ImunStem* and *Aktiffvate* the patient must be in stable condition and the diagnosis must be established as thoroughly as possible. This prepares the treating health professional, and the patient as well, for expected changes that can occur because of the disease process, thus avoiding possible confusion which might erroneously be attributed to the Golden Sunrise Nutraceutical herbal / botanical products. A thorough history (and physical exam as well) is necessary because the health professional can often appreciate improvement in areas that are ignored by the patient. For example, the patient may be discouraged by little improvement in their hand arthritis but when asked, they may acknowledge improvement in

their back pain, or energy level or insomnia, etc.

The *ImunStem* and *Aktiffvate* are the primary herbs of the whole program to begin the detoxification and repairing of the cells at the cell level. They prepare the immune system to respond appropriately to the Golden Sunrise Nutraceutical herbal / botanical products used in the *CANCER Plan of Care* protocols. Noticeable changes will occur when using *ImunStem* and *Aktiffvate*, whether it be increased energy, better ability to focus and concentrate, better sleep, improved joint pain, etc. In perhaps 2–3% of patients starting the *ImunStem* and *Aktiffvate*, the detoxification process may be more profound and may cause symptoms consisting of mild skin rashes, swelling in the face, hands or legs, headaches, poor energy, diarrhea, etc. These should be recognized not as a side-effect, but actually, the beginning of the healing process in the cells. This is caused by the release of toxins. These symptoms may last 2–7 days. Depending on the vigor of these symptoms, the dose may need to be reduced, or stopped altogether, for varying lengths of time. When resuming the *ImunStem* and the *Aktiffvate*, the dose usually needs to be started at a reduced dose.

In the *CANCER Plan of Care* the “Treatment, dosage and administration” call for “an initial five (5) sessions”. Each session has 2–bottles. The first bottle in each session are designed to reinforce and build upon what the *ImunStem* and *Aktiffvate* have started, e.g. nourishing the cells and flushing the toxins. But it is done in a much more powerful way. In the case of the *KemoHerbs*, it also destroys the cancer cells. The second bottle in each session prompts the natural flushing action of the body, that is vomiting and / or diarrhea to flush out the cancer cells and toxins (there can also be nasal discharge and coughing up sputum) (of interest these can be administered through a gastric tube or nasogastric tube. However, if the gastric tube was placed for dysphagia, then use of the gastric tube is contraindicated because of possible aspiration problem with vomiting). The general strength of the patient and their ability to comply with the *CANCER Plan of Care* protocol may limit them to the use of only the *ImunStem* and *Aktiffvate*.

4.0 TREATMENT, DOSAGE, AND ADMINISTRATION

First, *ImunStem* and *Aktiffvate* are taken simultaneously at $\frac{1}{2}$ – $\frac{3}{4}$ dropperful, 2–4 times a day, for approximately two (2) weeks before *KemoHerb* is administered. These products can improve the function of the immune system, as well as overall health. This step is very important, as it will maximize the effect of the *KemoHerbs*. An initial five (5) sessions of the *KemoHerbs* and *AnterFeerons* are given which are designed to be given very 2–4 weeks (it is highly recommended every two (2) weeks because of the seriousness of the condition). On occasion, the interval may be shortened to weekly or even more frequent intervals depending on the patient. Once the five (5) sessions are completed, and the patient’s condition is stable and shows appropriate improvement, other Golden Sunrise Nutraceutical products will be added, usually at 2–4 weeks intervals. These additional *KemoHerb* sessions (up to four (4) or five (5) additional treatments) will be included and are guided by the patient’s response and condition.

These are high quality herbal products, some of which include *AnterFeeron*, *CrProtein*, *HyProtein*, and *LyProtein*. Blood tests are at the discretion of the health professional, but it is recommended that a baseline of blood tests have been done before starting the *ImunStem* and *Aktiffvate*. Further blood tests could be done later, again at the discretion of the health professional, at two (2) weeks or four (4) weeks, etc.... Before starting the five (5) initial treatment sessions with the *KemoHerbs*, it is extremely important to verify if the patient is constipated. This needs to be corrected as well as possible beforehand, because the ability of the bowels to flush is the primary way of ridding the body of the toxins / cancer cells.

The “initial five (5) sessions” for the *KemoHerbs* and *AnterFeerons* consist of:

Liquids

Session #1: *KemoHerb-1* and *KemoHerb-2*

Liquids

Session #2: *KemoHerb-1* and *KemoHerb-2*, or *AnterFeeron-1* and *AnterFeeron-2*

Capsules and Liquids

Session #3, #4, & #5: *KemoHerb-PI* and *KemoHerb-NR*, or *AnterFeeron-1* and *AnterFeeron-2*

Each session is preferably 2–4 weeks apart. The interval may be shorter if the patient is extremely sick, but stable enough to tolerate the vomiting / diarrhea process.

The interval between *KemoHerb* sessions is rigid and is recommended to be every 2–4 weeks. The recommended sequence of the Golden Sunrise Nutraceutical herbal / botanical products can be interrupted with a different herbal / botanical products, usually *AnterFeeron-1* and *AnterFeeron-2* in either session #2, #4, or session #5, if the patient is not showing the expected flushing response of vomiting and / or diarrhea. A poor flushing response indicates that the patient is not ridding the body of the cancer cells/toxins appropriately. What is not “enough”? Perhaps only one (1) or two (2) episodes of diarrhea / bowel movements? It should be noted, however, that it is common not to have any vomiting in these sessions, so diarrhea episodes are more telling of the effectiveness of each session. The reason to interject the *AnterFeeron* early into the sequence is because it usually promotes the desired flushing response (besides fighting infection).

The other very important information to monitor after each session are the patient’s symptoms. Generally, they should feel stronger or more energy, etc... within 1–2 days after each session, indicating a proper response to each session as well. Frequently the lab / scanning results will lag behind the improvement in the patient’s symptoms.

For the liquid *KemoHerbs* and *AnterFeerons*, it is important to instruct the patient to walk around, if they can, in 5–10 minutes after swallowing the first one fluid ounce (1 fl.oz.) bottle.

In this short time there is frequently a better alertness or sense of energy, and if there are any pain issues, they are noticeably improved or completely resolved. Pointing this out to the patient is a quick positive reinforcer and encouragement of the effectiveness of the Golden Sunrise Nutraceutical herbal / botanical products. Perhaps five (5%) percent of patients will also notice, after the first bottle, better visual acuity or a “brightness” in the colors around them (indicating penetration of the Golden Sunrise Nutraceutical herbs across the blood-brain barrier into the central nervous system).

The duration of the flushing with the vomiting / diarrhea, generally lasts from 6–18 hours and rarely up to forty-eight (48) hours. The onset and duration of the vomiting / diarrhea after the second bottle in each session, varies not only for each person, but may also vary for the same person from session to session. Usually the onset is within thirty (30) minutes after ingesting the second bottle in each session, but it may not begin perhaps for up to six (6) hours. The *ImunStem* and *Aktiffvate* should not be taken on the same day of the session (the *ImunStem* and *Aktiffvate* will simply be flushed out) or the day after each session. It is advised that the patient should be fasting before the sessions except for liquids. It is also best to start the sessions in the morning, in order to hopefully avoid interrupting their sleep at night.

For any of the sessions, advise the patients to have some type of liquid electrolyte replenisher on hand, e.g., Gatorade, Coconut water, etc. to replace the diarrheal losses. Without this, typical dehydration symptoms can ensue, such as headaches, leg cramps, dizziness, weakness, etc.... Finally, for the liquid Golden Sunrise Nutraceutical herbal products in the first two (2) sessions of each protocol, direct the patient to pour the contents into a drinking glass instead of drinking it directly from the original one fluid ounce (1 fl.oz.) bottle provided. The liquid herbs must be drunk as quickly as possible, like a shot of liquor, without sniffing it or holding it in the mouth at all. Some people may need to be advised to pinch their nostrils to avoid smelling the herbal products as they swallow them. Have a glass or bottle of water on hand to wash it down immediately. Water, not milk or juices, generally helps better for the after-taste. Be careful to avoid too much water, because becoming water-logged can cause nausea as well. If the throat is very irritated, sucking on honey or syrup to coat the throat afterwards can be helpful. There have been few problems encountered in this process. However, some patients who have asthma have experienced bronchospasm. Taking 1–2 puffs of their rescue inhaler before swallowing the liquid herbs has avoided or minimized this reaction.

The other Golden Sunrise Nutraceutical herbal products, most of which are given after the initial five (5) sessions of treatment, are included in the price of the **CANCER Plan of Care** protocol. They include *AnterFeeron* (the *AnterFeeron-I* and *AnterFeeron-II* must be given in the same session), *CRProtein*, *HyProtein*, and *LyProtein*. They can be given in any order after the first five (5) sessions every 2–4 weeks. Many of them can also cause the same flushing response as the Golden Sunrise Nutraceutical herbal products used in the initial five (5) sessions. These are designed primarily to improve nourishing and building the immune system.

Lastly, it must be said, that the ability to heal by any discipline is influenced by numerous factors. This is no different with the healing properties of these herbs. Crucial factors, some of which are stress, diet, exercise, socioeconomic and psychological conditions, as well as family/friend support, affect the response to any healing modality for each person. Addressing these are required to help enhance the degree of healing that can occur for each person.

4.1 Administration and Dosage of *IMUNSTEM* and *AKTIFFVATE*

Upon the first visit it is suggested that once the medical evaluation of the patient is completed and the medical staff deems it appropriate, then patients will receive ½ – ¾ of a dropperful of *ImunStem* and *Aktiffvate* 1–4 times a day. The medical staff should monitor the patient for at least ten (10) minutes to help with any effects that might need other medical attention. For example, *ImunStem* can open and improve blood flow throughout the body and the patient might experience a feeling of warmth and begin having nasal mucus discharge. After ten (10) minutes if the patient is stable, the ¾-dropperful of *Aktiffvate* should be administered with similar monitoring.

***ImunStem* and *Aktiffvate* are liquid form:**

Product	Dose	Dose Size of a Dropper	Dose Per day
<i>ImunStem</i>	1 ml	½ - ¾	1–4
<i>Aktiffvate</i>	1 ml	½ - ¾	1–4

If the patient has a sensitivity of the mouth and / or throat, then the administration in one (1) teaspoonful of yogurt or filling empty gelatin capsules and swallowing them can be done.

4.2 Administration and Dosage of *KEMOHERBS*

Take one fluid ounce (1 fl.oz.) of *KemoHerb-1*. Medical staff should monitor the patient for forty-five (45) minutes to one (1) hour following ingestion of *KemoHerb-1*. Next take one fluid ounce (1 fl.oz.) of *KemoHerb-2*, the same dosage. Again medical staff should monitor the patient for thirty (30) minutes following ingestion of *KemoHerb-2*.

***KemoHerb-1* and *KemoHerb-2* are liquid form:**

Product	Dose
<i>KemoHerb-1</i>	1 fl.oz.
<i>KemoHerb-2</i>	1 fl.oz.

Take twenty-five (25) capsules of *KemoHerb-PI*, ideally within fifteen (15) minutes. After fifteen (15) minutes take, twenty (25) capsules of *KemoHerb-NR*, ideally within fifteen (15) minutes.

***KemoHerb-PI* and *KemoHerb-NR* are powder form:**

Product	Dose
<i>KemoHerb-PI</i>	25 capsules
<i>KemoHerb-NR</i>	25 capsules

4.3 Administration and Dosage of ANTERFEERONS

Take one fluid ounce (1 fl.oz.) of *AnterFeeron-1*. Then in forty-five (45) minutes to one (1) hour following ingestion of *AnterFeeron-1*, take one fluid ounce (1 fl.oz.) of *AnterFeeron-2*, administered in the same dose.

AnterFeeron-1 and *AnterFeeron-2* are liquid form:

Product	Dose
<i>AnterFeeron-1</i>	1 fl.oz.
<i>AnterFeeron-2</i>	1 fl.oz.

4.4 Administration and Dosage of CRPROTEIN

Take one fluid ounce (1 fl.oz.) of *CRProtein*. Medical staff may monitor the patient for forty-five (45) minutes to one (1) hour following ingestion of *CRProtein*.

CRProtein is liquid form:

Product	Dose
<i>CRProtein</i>	1 fl.oz.

4.5 Administration and Dosage of HYPROTEINS

Take twenty-four (24) capsules of *HyProtein-1* (ideally take each dose of twenty-four (24) capsules within a fifteen (15) minutes space of time). After thirty (30) minutes, take twenty-four (24) capsules of *HyProtein-2*. After thirty (30) minutes, take twenty-four (24) capsules of *HyProtein-3*. After five (5) hours, take twenty-four (24) capsules of *HyProtein-4* (½ of the bottle). After another five (5) hours, take the last twenty-four (24) capsules of *HyProtein-4*.

HyProteins are powder form:

Product	Dose
<i>HyProtein-1</i>	24 capsules
<i>HyProtein-2</i>	24 capsules
<i>HyProtein-3</i>	24 capsules
<i>HyProtein-4</i>	24 capsules

4.6 Administration and Dosage of LYPROTEINS

Take twenty-five (25) capsules of *LyProtein*, ideally within fifteen (15) minutes. After fifteen (15) minutes, take the last twenty-five (25) capsules of *LyProtein*, ideally within fifteen (15) minutes.

LyProtein is powder form:

Product	Dose
<i>LyProtein</i>	50 capsules

4.7 Treatment Interval and Duration of CANCER Plan of Care

The basic treatment recommended by Golden Sunrise Nutraceutical for cancer requires five (5) initial sessions of herbal (botanical) products (usually including *KemoHerb-1*,

KemoHerb–2, KemoHerb–PI, KemoHerb–NR, AnterFeeron–1, and AnterFeeron–2.

These are recommended to be taken every 2–4 weeks apart. Then additional sessions (up to four (4) or five (5) more) will be included, if warranted by the patient’s response and condition, with other high quality herbal products (some of which include ***CrProtein, HyProteins, and LyProtein***). These are also recommended to be taken every 2–4 weeks apart.

If the ***CANCER Plan of Care*** program has successfully arrested or reversed the cancer process, then every 6–12 months a detoxification Golden Sunrise Nutraceutical herbal treatment session will be used as a preventative treatment for cancer re-emergence. ***ImunStem*** and ***Aktiffvate*** will be continued indefinitely, but tapered to a lower dose, for example, ¼ dropperful of each every other day.

5.0 WARNING AND PRECAUTIONS

ADMINISTRATION OF ***IMUNSTEM, AKTIFFVATE, KEMOHERBS, ANTERFEERONS, CRPROTEIN, HYPROTEINS*** AND ***LYPROTEIN*** SHOULD ALWAYS BE UNDER THE SUPERVISION OF A PHYSICIAN. RECOMMENDATION FOR GOLDEN SUNRISE NUTRACEUTICAL ***CANCER PLAN OF CARE*** IS BASED ON MEDICAL EVALUATION OF THE PATIENT, AND LABORATORY RESULTS. ONLY USE UNDER THE SUPERVISION OF A PHYSICIAN’S CARE.

6.0 THERAPEUTIC RESPONSE

6.1 Expected Response of *KemoHerbs, AnterFeerons, CrProtein, HyProteins, and LyProtein*

The ***CANCER Plan of Care*** process can promote the body’s natural cleansing process which usually will include responses such as nausea, vomiting, diarrhea, and mucus discharges. Other possible symptoms a person can experience may depend on the person’s previous health issues, such as headaches, migraines, weakness, muscle aches, joint pain, heart palpitations, inflammation of the throat, excessive bloating, gas, and shortness of breath. These symptoms are only temporary at the time that the patient is being treated with ***CANCER Plan of Care***. ONLY USE UNDER THE SUPERVISION OF A PHYSICIAN’S CARE.

6.2 Adverse Sensitivity Response of *ImunStem and Aktiffvate*

- Can cause severe allergic skin rashes.
- Vomiting.
- In rare circumstances an adverse sensitivity response in the mouth, such as mild blisters, have occurred.
- A burning sensation in the throat in the beginning of oral treatment may occur, but it subsides. If the burning sensation persists, gelatin capsules used for administration, may be substituted as an alternative.

7.0 CLINICAL PHARMACOLOGY

7.1 Mechanism of Action

Golden Sunrise Nutraceutical produces herbal (botanical) products which help to regenerate the cell and promote the cellular metabolism to return to homeostasis in the human body.

It is postulated that in arresting abnormal cellular mutation, the precursors for normal and enhanced cellular regeneration and cellular division can be accelerated in relation to the selective existing disease pathology. It is therefore theorized that the combination of the body's thermal energy, particularly during variance mutation and inflammatory processes, potentiates the self-propelling of molecules by possible passive membrane transportation or passive diffusion of the Golden Sunrise Nutraceutical products intact across all cell membranes. This also includes across the blood-brain barrier, which allows its efficacy and activity for the central nervous system.

Golden Sunrise Nutraceutical products possess a bipolarity and a lipophilicity that facilitates molecular diffusion through various permeable and selective membranes. In-vivo studies on test subjects have indicated that the cell membrane integrity remains intact and is not disrupted or destroyed in the process of assimilating into the cell, thus ensuring long-term effectiveness.

The technology developed by Golden Sunrise Nutraceutical is the key for the various herbs' effectiveness on the immune system and cellular metabolism. They have immune-stimulating properties. In-vivo studies on treated patients demonstrate increasing phagocytic activity and synthesis of helper cell function. Golden Sunrise Nutraceutical products have shown to transform Deoxyribonucleic Acid / Ribonucleic Acid (DNA / RNA) repair, before, during and after chemotherapy drugs, prescription drugs, toxic exposure and chemical induced damage. These herbs have a variety of effects including anti-oxidant activity and anti-inflammatory properties.

Golden Sunrise Nutraceutical products can play an integral role in hypothalamic activity, easing both parasympathetic and sympathetic nervous systems towards a state of homeostasis. For example, blood pressure level is directly linked to the sympathetic nervous system. The normalizing of blood pressure levels exhibited following administration of Golden Sunrise Nutraceutical products are compatible with the stabilization of the sympathetic nervous system activity. Golden Sunrise Nutraceutical products reduces inflammation by affecting immune responsiveness through neuroendocrine factors. Improvement of balance problems, a side effect of some chemotherapies, by Golden Sunrise Nutraceutical products is thought to be from improvement of vestibular function. Golden Sunrise Nutraceutical products have produced significant drop in blood sugar levels. Documented drop in blood sugar has occurred from

440 mg/dL to 59 mg/dL in less than two (2) hours without the patient experiencing any symptoms such as dizziness, weakness, sweating, etc., and still carry on the usual daily activities. Cancer metabolism requires glucose for the fermentation process (glycolysis) to produce its energy for growth and development. This drop in blood glucose arrests the fermentation process and the cancer.

7.2 Pharmacokinetics

Golden Sunrise Nutraceutical products are readily absorbed into soft tissue when taken as an oral dose. This is accomplished because Golden Sunrise Nutraceutical products readily passes through membrane tissue by passive diffusion.

The Golden Sunrise Nutraceutical dietary supplements are metabolized by the body to more hydrophilic products that are excreted in the urine and feces.

8.0 RESULTS OF PATIENTS AFTER TREATMENT

do not use if safety seal is damaged or missing

SUPPLEMENT FACTS		
Serving Size: (1 fl.oz.) (491.50mg)		
Serving Per Container: One (1) serving		
Amount Per Serving		%DV
Bilberry leaf	40mg	**
Graviola extract	120mg	**
Goldenseal extract	80mg	**
** Daily Value (DV) not established.		

Other Ingredients: solvents, organic compounds, Chuchuhuasi extract, Cayenne, Maca, and Turmeric.

STRUCTURE FUNCTION

“Support Immunity” and “Boost Stamina”

“Helps Maintain Joint Health and Flexibility”

“Helps Maintain Cardiovascular Function and a Healthy Circulatory System”

“Reduces Stress and Frustration”

The *KemoHerb-1* has no side-effects. It will promote the body’s natural cleansing process which may include purging responses such as nausea, diarrhea, vomiting and mucus discharges. Other possible symptoms a person can experience may depend on the person’s previous health issues, which may include headaches, migraines, weakness, muscle aches, joint pain, heart palpitations, inflammation of the throat, excessive bloating, gas, and shortness of breath. These symptoms are only temporary at the time that the patient is being treated with *KemoHerb*. **ONLY USE UNDER THE SUPERVISION OF A PHYSICIAN’S CARE.**

Administration: Empty entire contents of *KemoHerb-1* into a glass cup and swallow entire contents.

Dosage: Take one fluid ounce (1 fl.oz.)

KemoHerb-1 dietary supplement may support immunity, improve overall health for the human body and maintain good well-being.

WARNING: Not recommended for use by pregnant or nursing women. Should you have any questions regarding the use of *KemoHerb-1*, please consult your doctor or call the product hot line in U.S.A. at 1.559.781.0658 or 1.559.361.0097. Keep out of reach of children. To be kept in a dry and cool place.
