

Professional Services in
Clinical Drug Development

Our Mission:

Our purpose is to provide contract research services to the pharmaceutical industry. Our mission is to fulfill our obligations in an exceptional manner so that our clients will view us as partners rather than participants in their clinical research and development efforts. We help our clients achieve their goals faster and more efficiently through excellence in our work and through thoughtful, knowledgeable consideration of the tasks entrusted to us. Our creativity and dedication are apparent in the working relationships that we have with our clients and in the final work that we produce. We look forward to the opportunity to serve you. 

ROHRBAUGH ASSOCIATES, INC.

Thomas M. Rohrbaugh, Pharm.D., President of Rohrbaugh Associates, Inc., brings over 17 years of industry experience in clinical research and development. He directs a highly skilled and dedicated staff that is committed to providing each and every client with quality work within the agreed timelines. This ensures a smooth flow of service from the first step of the research process through the final delivery of completed results.

Rohrbaugh Associates provides professional services in clinical research and drug development, including all phases of development planning, IND preparation, protocol writing, site monitoring, project management, data management and final study report preparation. We have broad experience in many therapeutic areas. These skills, as well as our ability to tailor each service, allows us to work on an entire project from start to finish, or on any part, giving each client more flexibility and better cost control. With this type of approach, it is clear that Rohrbaugh Associates has built a reputation that is truly first rate.

CLINICAL TRIALS MANAGEMENT

Our Clinical Trials Management group provides a broad array of services to manage all or part of your specific clinical trial needs. Our experience and expertise has earned Rohrbaugh Associates a reputation for quality, accuracy and performance from the start to completion of each study we manage. We accomplish this by offering a full range of services including:

- Clinical trial and protocol design
- Project management and support
- Investigator selection
- Negotiation of study budgets
- Clinical monitoring and management
- GCP audits
- Review, evaluation and analysis of data
- Drug storage and distribution
- Complete tracking and reporting

Rohrbaugh Associates utilizes the highest standards in clinical trials management to ensure integrity and discipline which allows our clients to receive quality, on-time clinical research results.

MEDICAL WRITING

Rohrbaugh Associates is highly experienced in all forms of medical and technical writing. Our staff of writers have prepared and written numerous reports covering a wide range of drug development and other scientific areas. We work together to provide accuracy, consistency, reliability and cohesiveness. Our medical and technical writing services include:

- Clinical development plans
- Case report form completion manuals
- Interim and final study reports and manuscripts
- Protocols
- Investigator brochures
- Articles for publication
- INDs
- NDAs

Our commitment to produce documents that are clear and concise is evident in everything we prepare. From word processing, table and graph design, and document management; to final composition and filing, our staff ensures the highest level of professionalism.

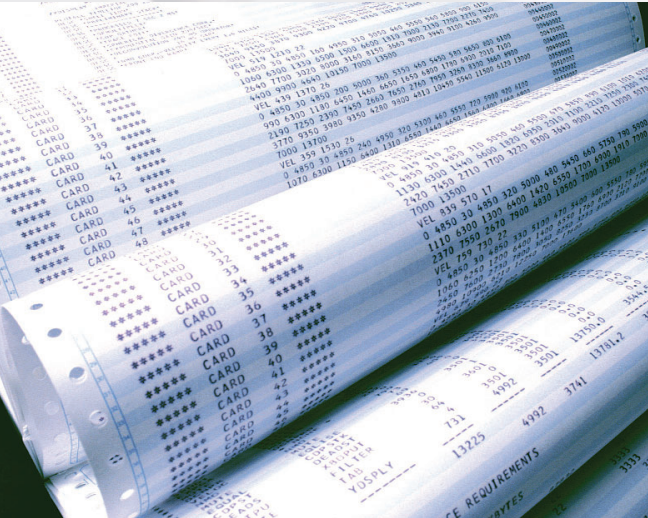

DATA MANAGEMENT

Collecting, checking and analyzing the data from a study requires careful attention to detail. Rohrbaugh Associates realizes the importance of this service and the challenges involved in producing error-free information. Their dedicated and experienced personnel provide the following data management services:

- Case report form design
- Collection of data
- Database setup and data entry
- Data review and clean-up
- Resolution of data errors
- Dictionary coding
- Data analysis
- Biostatistics

We also understand the need to use the latest technology to provide speed and versatility for our client's projects. This combination allows Rohrbaugh Associates to accommodate all your data management needs without additional costs or loss of time.

THERAPEUTIC AREAS

Rohrbaugh Associates is well versed and very experienced in many therapeutic areas, such as:

- Allergy and Immunology
- Cardiology
- Endocrinology
- Gastroenterology
- Hematology
- Infectious Diseases
- Neonatology
- Neurology
- Oncology
- Quality of life
- Respiratory Disorders
- Urology

Since Rohrbaugh Associates' experience is constantly growing, please contact us for a complete and up-to-date list of therapeutic areas in which we have experience.
