

REQUEST FOR PROPOSALS FOR YTTRIUM Aluminum GARNET (YAG) and SELECTIVE LASER TRABECULOPLASTY (SLT) COMBINATION OCULAR LASER

RFP Field	Information
Issuing Organization	Warm Valley Health Care
Project / Funding Source	Rural Health Transformation Program – Integrated Primary Care Initiative
Department / Service Area	Optometry Department
Primary Contact	Chad Krezelok, Optometry Supervisor Email: chad.krezelok@warmvalley.health phone: 307-332-7300
RFP Release Date	October 26, 2026
Proposal Due Date	November 02, 2026
Anticipated Award Date	November 09, 2026
Requested Implementation Period	December 1, 2026, through September 30, 2027

Project Background and Purpose

This request for proposals seeks qualified vendors to provide Yttrium Aluminum Garnet (YAG) and Selective Laser Trabeculoplasty (SLT) combination ocular laser and implementation support that will strengthen Warm Valley Health Care's (WVHC) integrated primary care operations. The selected vendor must demonstrate experience in healthcare settings, compatibility with WVHC's existing clinical systems, and the ability to complete procurement, installation, configuration, training, and go-live support within the required project period.

Warm Valley Health Care (WVHC) is a primary care clinic operating on the Wind River Indian Reservation in central Wyoming. WVHC was established by the Eastern Shoshone Tribe in 2024 under the Indian Self-Determination and Education Assistance Act, Title V Compact. The transition from Indian Health Service-operated care to tribal operation gives the Tribe greater authority to design, manage, and improve health services in ways that reflect local values and patient needs. WVHC provides medical, behavioral health, optical, and dental services to tribal families across the Wind River community.

As part of its efforts to improve community services and strengthen patient outcomes, WVHC is implementing a primary care expansion project to modernize the facility and purchase essential equipment. Yttrium Aluminum Garnet (YAG) and Selective Laser Trabeculoplasty (SLT) combination ocular laser must support integrated primary care, be compatible with WVHC's current systems, and meet applicable health privacy and security standards. Because the project must be completed within 12 months, all equipment must be procured, installed, configured, and ready for operational use by the end of the project period, and all associated costs must be obligated within the required funding timeline. The required provisions for this solicitation are outlined below.

Scope of Requested Technology, Equipment, or Services

Vendor proposals should include all equipment, software, hardware, licensing, accessories, installation, configuration, training, warranty, maintenance, technical support, data migration or integration support, if applicable, and any other items necessary for full implementation and operational use. WVHC currently uses the Cerner electronic health record system, and proposals should describe any integration, workflow, reporting, or technical requirements related to that environment. Proposals should also be concise, complete, and organized in the same order as the requirements listed below. Vendors should include enough detail for WVHC to evaluate clinical fit, implementation readiness, total cost, privacy and security, and long-term support obligations. Incomplete proposals or proposals that do not clearly address the required categories may be deemed nonresponsive.

Category	Requirement
Company Overview	Provide company overview, years in business, healthcare experience, and relevant references.
Description of Proposed Equipment	Describe proposed equipment, technology, software, or services.
Pricing	Provide itemized one-time costs, recurring costs, licensing, implementation, training, maintenance, shipping, travel, and optional add-ons.
Technical Specifications	Provide model numbers, technical specifications, space, power, network, hardware, software, and accessory requirements.
Clinical Functionality	Describe how the technology supports the intended clinical service, patient workflow, documentation, quality, and patient safety needs.
Interoperability / Integration	Describe compatibility with existing clinical systems, electronic health record workflows, reporting tools, imaging systems, pharmacy systems, or other relevant platforms.
Privacy and Security	Describe safeguards for protected health information, user access controls, audit logs, encryption, incident response, confidentiality, and business associate agreement needs, if applicable.
Implementation and Training	Provide installation steps, implementation timeline, staff training plan (if applicable), go-live support, and stabilization support.

Warranty, Maintenance, and Support	Describe warranty terms, preventive maintenance, response times, technical support hours, replacement parts, service agreements, and escalation procedures.
Disclosure	Disclosure of any facility, staffing, connectivity, electrical, space, licensing, or workflow requirements needed for successful implementation.

Proposal Evaluation Criteria

Proposals will be scored in accordance with the following evaluation factors. Reviews will be completed by the appropriate department supervisor, a Finance representative, the Clinical Applications Coordinator, a Grants Department representative, the Compliance Officer, and the Chief Executive Officer. Warm Valley Health Care reserves the right to reject any or all proposals, request clarification, negotiate terms, and select the proposal that best meets clinical, operational, compliance, timeline, and budget needs.

Evaluation Factor	Weight
Clinical fit and ability to meet service-line needs	25%
Technical specifications, reliability, and compatibility with existing systems	20%
Implementation plan, training, support, warranty, and maintenance approach	20%
Privacy, security, compliance, and documentation readiness	15%
Cost reasonableness, transparency, and total cost of ownership	15%
Healthcare experience and vendor capacity	5%

Submission Instructions and Terms

Proposals must be submitted by 5:00pm MST on November 02, 2026, via email to chad.krezelok@warmvalley.health. The review process is expected to begin within one week after the submission deadline. Award of a contract is contingent upon funding availability, internal approval, successful completion of any required procurement documentation, and WVHC's determination that the selected proposal best meets the organization's clinical, operational, compliance, timeline, and budget needs.

Questions regarding this RFP must be submitted in writing to the primary contact by the deadline listed above. WVHC may share responses or clarifications with all known prospective vendors to maintain a fair and consistent procurement process.

Vendors may submit questions during the RFP period to the primary contact identified above. WVHC appreciates each vendor's interest and looks forward to reviewing responsive proposals.
