

What can our coatings do for YOU?

Ceramic coating benefits are in abundance. If you really care about your ride, then take a look at what a ceramic coating can do for you.

Hydrophobicity

Perhaps the biggest of all ceramic coating benefits: being able to shed water off of your surface quick and easy. The elements of the outdoors stand no chance against our world-class coating. Water and other liquids roll right off the surface like magic.

Oleophobicity

We don't stop at water. Our ceramic coating goes one step further to repel oil-based liquids. Your vehicle is exposed to all sorts of oils and can quickly turn into a mess. Make the job easier on yourself!

Scratch Resistance

Nothing is more heartbreaking than seeing scratches on your car's paint. Putting on our ceramic coating benefits your paint's resistance to scratches that can ruin the look. 10H hardness comes standard in our products, so you're getting the best the market has to offer.

Easy to Clean

With DuraSlic, cleaning your ride has never been easier. Thanks to our hydrophobic and oleophobic technology, dirt, mud, bugs, and other grime are no match for your paint!
