**To whom it may concern Recipient:**

I would like to start off by saying what a great experience we had from start to finish with everyone we came in contact with at American Southern Roofing. From our first meeting to job site clean up the process was nothing but flawless, they really have taken pride in their customer service experience. Through-out our project we were kept updated every step of the way. I would also like to point out their high safety standards and procedures, for both crew on roof and our employees around the plant. American Southern not only delivered the project on time but took the extra time to leave the job site spotless.

We will be using them again on future projects.

Sincerely,

Cohan Sharp
