2 REASONS WHY YOU SHOULD WEAR SUNSCREEN DAILY

ERYFOTONA FAVORITES

A photolyase-based product line
for all patient types

Ask our staff
why Eryfotona
is more than
just a
sunscreen!

Our bestselling mineral sunscreens
help to repair existing sun damage
and improve overall skin health with
the perfect finish.

ISDIN
LOVE YOUR SKIN

EXPERTS IN PHOTOAGING

The only reasons you need to worry about

While I could write a book on why it is important to wear sunscreen on a daily basis, I will spare you the long winded rant. There are only 2 reasons, in my opinion, why you should start wearing sunscreen NOW! I am sure you've heard of the first, Cancer. Cancer sucks. Not only does cancer suck, but getting it on your face or anywhere on your body and having to get it cut out and potentially cut out again if they didn't get it all, is a terrible thing to go through. Reason number two, WRINKLES. I bet you didn't see that coming!

Many people do not realize the impact the sun has on their skin. From uneven skin tone, to scarring, to fine lines that are impossible to get rid of.

Why ISDIN Ageless is my favorite

The only sunscreen I put on my face

I discovered ISDIN Ageless at an aesthetic conference a few years ago. I was looking at all the medical grade skincare lines offered and stumbled on the ISDIN booth because, well, they were giving out free samples. Duh! I tried the sunscreen and have been loyal ever since. Here's the thing, what drew me to the brand at first was the look and feel, but then I learned the many benefits of the sunscreen and fell in love! You will likely see this brand in many dermatologist offices and for good reason! This particular brand has an amazing ability to decrease old sun damage while preventing new. All sunscreens shield you from the sun, whether from chemical or

mineral ingredients, but not all sunscreens can say they reverse old sun damage in your cells to lighten and lessen the actinic damage that you already have on your skin. ISDIN does this! So, not only does it feel like the lightest, non greasy sunscreen ever, but it is actually fixing and repairing damage you did years ago. That's a total win win in my book.
