

GATE ACCESS DEVICE POLICY & REGISTRATION FORM

Homeowners can purchase RFID headlight stickers at a cost of \$25.00 per sticker.

In order for these stickers to work, they need to be placed on the passenger-side headlight towards the middle of the headlights. Tags cannot be transferred from car to car. After receiving all the required lease documentation, new tags must be purchased for those renting in the community.

All vehicles must be parked either inside a homeowner's garage or on the property driveway - in accordance with the Associations Community Guidebook and the Declarations.

This device is for accessing the community only, and in no way is it to be perceived as a Parking Permission, Towing enforcement will remove offending vehicles should they not display a valid Temporary Parking Pass. With this registration the vehicle owner acknowledges and waives their rights to the 24-hour warning/notice period associated with towing operators.

When you sell your vehicle, or move out of the community, please make a note of the device number on the vehicle/s and advise the Community Manager, to facilitate deactivation of the device

If the gate access device does not work, please contact the HOA at Edgewood.bod@gmail.com
