SESSIONS FOR SENIORS

**Teach-Technology
Organization, Inc.**

Non-Profit Organization

OUR STORY

Teach-Technology Organization, Inc. is a registered non-profit organization. Our mission is to help bridge the digital divide with seniors and to help all people learn programming and technology skills.

OUR OBJECTIVE

Our main objective at Teach-Technology Organization, Inc. is to help seniors with their technology devices and help them incorporate technology into their life to the fullest potential; and to teach children and adults various technology and programming concepts.

OUR RESULTS

Carrie Saint-Martin

Activities Director for Independent Senior Residents at The Villas at Canterfield

"Our senior resident community at The Villas at Canterfield is very fortunate to benefit from the services of Teach-Technology Organization, Inc. Their volunteers have been instrumental in removing the fear factor of learning new technology skills among an older age group. Their services maintain a consistent track record of knowledge, reliability and professionalism, which have been highly appreciated and valued by not only our senior residents, but also employees, and caregivers. Thank you for a job well done!"

What we do

We host free-of-charge technology sessions for your seniors at your senior living facility. Seniors can bring any technology device they are having trouble with and receive free help from our tech-savvy volunteers.
