

# 57<sup>th</sup> North American Chemical Residue Workshop (NACRW)

**July 26-30, 2021**

**Virtual Conference**

**All presentations and posters available online!**

**Student Scholarship Submission Deadline: May 28, 2021**

Scholarship form and abstract should be submitted through the submission platform on [www.NACRW.org](http://www.NACRW.org)

**Important: Students will receive a scholarship award and free registration for NACRW 2021.**

Topics include:

- Analytical chemistry of residues including pesticides, veterinary drugs, toxins, and heavy metals in food and feed, cannabis, and environmental samples
- Sample preparation
- Analysis of foodborne pathogens
- Method development and validation

Past NACRW technical programs for appropriate topics are available [here](#).

*NACRW is expected to have over 400 attendees representing government, academia, and industries from all over. Students can network with accomplished scientists.*

Requirements:

- 5-minute pre-recorded poster preview presentation
- Technical poster and attendance during virtual poster sessions

Optional:

Presenting students are invited to submit a manuscript for publication in a special issue of the *Journal of Agricultural and Food Chemistry* ([JAFC](#)).

For additional information, please visit NACRW [online](#) or contact Katie Carlos at [Katherine.carlos@fda.hhs.gov](mailto:Katherine.carlos@fda.hhs.gov).
