

**Welcome to the July 26, 2021 NACRW Veterinary Drug Working Group meeting.**

**The goal of the Veterinary Drugs WG is to identify Multi-Residue/Multi-Class Vet Drug Residue Methods (> 100 analytes) that meet the needs of regulators.**

- [Steve Lehotay, from the U.S. Department of Agriculture](#)
- [Anton Kaufmann from the Official Control Authority in Switzerland](#)

will discuss MS-based identification techniques.

They will be followed by the co-chairs of the Vet Drugs Working Group

- [Sherri Turnipseed from the U. S. Food and Drug Administration](#)
- [Eric Verdon from ANSES, the French Agency for Food, Environmental and Occupational Health & Safety.](#)

Sherri and Eric will describe the collaborative study being planned.
