

Lighting Photography Project

This project is designed for you taking photos while being creative in the use of Lighting.

Requirements:

You must create four pictures where the subjects in your photos show the use of Lighting. You can use objects and people in combination to create a more interesting photograph. All the photographs you take must be related to these concepts.

*Example photos are provided on the back of this worksheet.

Considerations:

Experiment with Natural and Artificial light.

Submit:

- 4- Images that present the use of Lighting
 - 2- Natural Lighting Photos
 - 2- Artificial Lighting Photos

Images can be of people or objects. Answer the questions below:

Answer these questions at the end of your Power Point:

1. How does Natural Light effect your photographs?
2. How does Artificial Light effect your photographs?
3. Which do you like better for taking pictures, Natural or Artificial Light? Explain why.
4. Without Light there would be no image, why is light and quality of light so important in making/ taking great pictures?

Natural Lighting

Artificial Lighting
