

## **Lenses Project**

This project is designed for you to experiment with taking photos using different camera lenses. You may choose which ones you would like to use to take your pictures, but you must submit photos using at least 3 different lenses.

### **Requirements:**

You will need to take at 1 picture to submit from 3 different style lenses. For each lens you need to include which lens you used and what the settings were on the lens.

### **Considerations:**

Use different lenses available:

- Micro 40mm
- Fisheye 10.5mm
- 35mm Portrait
- 50mm Portrait
- 10-20mm Wide Angle
- 55-200mm Zoom
- 55-300mm Zoom
- Tilt Shift (must review manual before use)
- 18-55mm Standard Lens

### **Submit:**

Your 3 best images.

Pictures are to be submitted digitally.

Include:

- Lens Used
- Focal Length
- F Stop

Answer these two questions:

1. Which was your favorite lens to take a picture with?
2. Did you find it difficult to use different lenses? Why or Why not?

3- Images each taken with a different type of lens.
